

# Pediatric Urologists of Nemours/Alfred I. duPont Hospital for Children

1600 Rockland Road | Wilmington, DE 19803 | Tel: 302-651-5980 | Fax: 302-651-6410

Members of the Division of Urology offer comprehensive evaluation and treatment for infants, children, and adolescents who have urologic disorders. Diagnoses include newborn anomalies and urologic conditions of infancy and childhood.

A team of specialty-trained and experienced pediatric urologists evaluate and treat a variety of urological conditions and genital abnormalities. Perinatal consultations for urinary tract anomalies are available through the Nemours Partners for Perinatal Management Program at the Nemours/Alfred I. duPont Hospital for Children. Surgical management includes laparoscopy, endoscopic management of vesicoureteral reflux, ureteroscopy and Holmium laser lithotripsy, extracorporeal shock wave lithotripsy, and genito-urinary reconstructive surgery. Special services include bladder clinic, non-invasive uroflowmetry and biofeedback programs for urinary incontinence. Typical conditions treated:

- hydrocele
- hydronephrosis
- hypospadias
- kidney stones
- neurogenic bladder
- phimosis
- undescended testes
- urinary tract infections
- urinary tract obstruction
- vesicoureteral reflux

**Dr. Figueroa**

**T. Ernesto Figueroa, MD**, is Chief, Division of Urology at Nemours/Alfred I. duPont Hospital for Children and Director of the Pediatric Urology Fellowship Program. He is an Associate Professor of Urology at Jefferson Medical College. Dr. Figueroa is a graduate of Tulane University School of Medicine in New Orleans where he completed a residency in urology. He completed a fellowship in pediatric urology at Children's Hospital of Michigan. Dr. Figueroa is certified by the American Board of Urology with subspecialty certification in Pediatric Urology, and is a Fellow of the American Academy of Pediatrics, American College of Surgeons, and Society for Pediatric Urology. His clinical interests include: neurogenic bladder, stone disease, laparoscopy, undescended testes, hypospadias, congenital genital anomalies, pediatric urologic malignancy, vesicoureteral reflux, urinary tract infections and voiding disorders in childhood.
