

SpeakUp™

Having a Safe Operation

Your child's health and safety are important to us. You can make a difference in your child's care by asking questions and being actively involved.

What can you do to help keep your child safe before going to the hospital?

Ask that any sedatives (sleep medicines) be given at the hospital and not at home before going to the hospital. Talk to the surgeon and others who will operate on your child. Ask how much experience they have performing the operation. It is important that you are confident in the ability of the people who will operate on your child. Ask what you can do to help prepare your child for the surgery.

What can you do to help keep your child safe before the operation?

Talk to the surgeon about the part of your child's body that will be operated on. Ask the surgeon to mark the part to be operated on while you are in the room. This will make sure it is the correct part. Make sure the surgeon marks only the correct part and nowhere else.

What can you do to help keep your child safe after the operation?

Ask if pediatric specialists will be caring for your child in the recovery area.

What can you do to make sure your child is safe after leaving the hospital?

Ask about the care your child will need at home. Get written instructions. Get the names and phone numbers of people to call if you have questions or in case of an emergency.

Contact your child's care providers if you have any questions or concerns.
