**Caring for children as if they were our own.** The Nemours Foster Care Health Program is dedicated to promoting the health and well-being of children and teens in foster care. Services include initial evaluations, care coordination, preventive care, and provision of a medical home for children with chronic illness, developmental or behavioral challenges, or other health issues.

The program offers intake screening visits for children and teens entering the foster care system or changing placements, aimed at addressing acute issues and identifying major needs. Comprehensive evaluations include gathering and reviewing all available medical records and producing a summary report. Routine primary care or assistance with finding a primary care physician is offered for families who need it.

Nemours pediatric and adolescent medicine specialists deliver comprehensive care with a full range of diagnostic and treatment services for infants, children and teenagers. The program features an integrated medical record that unifies patient care across providers and locations, with facilities specifically designed for children and their families.

**Krishna White, MD, MPH,** Co-Director of the Nemours Foster Care Health Program, is a pediatrician and Director of Adolescent Medicine at duPont Hospital for Children. She is a graduate of Eastern Virginia Medical School in Norfolk, VA. She completed her residency in pediatrics at The Children’s Hospital of Philadelphia, and served her fellowship in Adolescent Medicine at Children’s National Medical Center in Washington, DC. Dr. White also obtained a Masters of Public Health in Health Policy at The George Washington University. She is certified by the American Board of Pediatrics. Her special interests include reproductive health including birth control, period problems, STD testing, etc.

**Amy Renwick, MD,** Co-Director of the Nemours Foster Care Health Program, is a pediatrician and Director of Primary and Consultative Pediatrics at duPont Hospital for Children. She serves as co-director of the Adoption Consultation Service. Dr. Renwick is a graduate of the University of Pennsylvania School of Medicine. She completed her residency in pediatrics at Jefferson Medical College/Alfred I. DuPont Hospital for Children and is certified by the American Board of Pediatrics. Her special interests include adoption and foster care, portable medical records and care transitions.

**Stephanie Walter, DO,** is a pediatrician at duPont Hospital for Children and Assistant Professor of Pediatrics at Jefferson Medical College. A graduate of the University of Medicine and Dentistry of New Jersey School of Osteopathic Medicine, she completed her residency in pediatrics at Jefferson Medical College/Alfred I. duPont Hospital for Children. She is certified by the American Board of Pediatrics. Prior to graduating from medical school, Dr. Walter also obtained a Master of Education degree from the University of Virginia in Charlottesville. Her special interests include special needs patients, and she also serves as Director of the Hospital’s Enuresis Program.

**Alexa Ujlaky, MSW, LSW** is a social worker at the Nemours/Alfred I. duPont Hospital for Children. She received her Master’s Degree in Social Work from West Chester University and received her medical social work training from working on the rehabilitation unit at the duPont Hospital for Children. She also did work at the Chester County Intermediate Unit, in an emotional support classroom setting for young children. Currently, she is the social worker for this Foster Care Health Program, Neurology, and the outpatient clinics for PKU (Phenylketonuria), Down Syndrome, and Developmental Medicine. Her passion is working with and for children and their families to be an advocate in many different capacities.
