KidsHealth is the largest resource of online children's health, behavioral, and developmental information written for three distinct audiences: parents, kids, and teens. Each year, over 120 million families turn to KidsHealth.org for expert answers, making it the most-visited Web site devoted to children's health. KidsHealth has a physician-directed, professional editorial staff that creates engaging online, print, and video media about a wide range of children's health and parenting issues.

KidsHealth in the Classroom (KidsHealth.org/classroom) is KidsHealth’s free Web site for educators and features standards-based health curricula, activities, handouts, and more. For more information about KidsHealth in the Classroom, visit KidsHealth.org/classroom.

KidsHealth comes from The Nemours Foundation, one of the largest nonprofit organizations devoted to children's health. For more information about KidsHealth, please visit KidsHealth.org.

Nemours Health and Prevention Services (NHPS), based in Newark, Delaware, works with families and communities to help children grow up healthy. It is the newest division of Nemours, one of the nation's largest pediatric health systems, operating the Alfred I. duPont Hospital for Children and outpatient facilities throughout the Delaware Valley and northern and central Florida. NHPS expands Nemours' reach beyond clinical care to consider the health of the whole child within his or her family and community.

NHPS sees its role as one of catalyst, “planting the seeds for better health” by working with community partners to reach children where they live, learn, and play. Its initial areas of emphasis are childhood obesity prevention and child emotional/behavioral health. The goal is to impact long-term changes in policies and practices that promote child health and to leverage community strengths and resources to have the greatest impact on the most children. Visit us online at www.GrowUpHealthy.org.

The Children and Families Commission of Orange County

The Children and Families Commission of Orange County oversees the allocation of funds from Proposition 10 that adds a 50-cent sales tax on tobacco products sold in California to fund education, health and child development programs for children from the prenatal stage to age five and their families. For more information, please visit www.occhildrenandfamilies.com.
Welcome to the Healthy Habits for Life Child Care Resource Kit

Childhood is an exciting time when children begin to learn about themselves and the world around them.

These years are also the time when children begin to develop habits relating to eating and playing. Such habits can affect them throughout their lives.

As a child care provider, you have the wonderful opportunity to help lay a healthy foundation. In addition to their families, you are their model for food and fitness. The Healthy Habits for Life Child Care Resource Kit and accompanying DVD will give you the tools you need to teach children about eating right and being physically active so that they can establish healthy habits for life. On the following pages, you will find:

- easy-to-use, fun lessons and activities that will fit in with your existing routines;
- ways to establish a connection with children's families so that children continue to practice healthy habits at home.

Plus, the familiar Sesame Street characters will help you engage children as they learn!

What YOU Will Learn
In order to teach the basic concepts of nutrition and physical fitness to the children in your care, this kit will:
- offer information about nutrition and physical activity for young children,
- help you to use this knowledge in your group setting, and
- present you with exciting options for improving nutrition and increasing physical activity during the course of your day.

What CHILDREN Will Learn
Because the greatest learning takes place in an atmosphere of fun, this kit, featuring the Sesame Street friends, is designed to provide an entertaining environment in which children will:
- understand the health benefits of eating well and playing actively,
- be able to name some healthy foods,
- be more likely to try new foods, especially fruits and vegetables,
- take part in a variety of physical activities, and
- be able to explore at home the lessons they learned in your program.

Introduction

The *Healthy Habits for Life Child Care Resource Kit* is a comprehensive tool to help you integrate nutrition and physical activity into your program.

Here’s a fun-filled, hands-on resource kit to help you and your children find ways to get moving and make healthy food choices along with *Sesame Street* friends. You’ll find tons of activities, games, poems and songs, dances, and ways to include learning about healthy choices into your everyday routines.

It’s easy to use. This kit is designed to be used throughout the day and to easily fit into your daily routine. The activities don’t require a lot of time or preparation, and they’re versatile. You’ll find activities for large and small groups, indoor and outdoor learning, and active and quiet play. Choose the activities that work best for your group.

It’s fun for everyone – even you! All of the activities are designed to include all children – and you! When children see that you are excited about staying healthy and learning along with them, they are more likely to be engaged. The silly and joyful *Sesame Street* characters will add to the fun you’ll have together.

- **Section 1, Get Moving!** focuses on physical activity and how it builds strong, healthy bodies.
- **Section 2, Food and Drink to Grow On**, highlights ways we can make healthy food choices.
- **Section 3, Every Day Is a Healthy Day** builds upon the first two sections to help children remember what they’ve learned – and celebrate their new knowledge.

As you already know, children learn best when there is a strong partnership between home and school, so the *Healthy Habits for Life* kit also helps you involve families.

Now turn the pages and begin building healthy lifestyles!

Allergies & Choking Hazards

- You know your children best and should, as always, make adaptations based on food allergies and children’s unique needs. Of course, be aware of possible choking hazards for preschoolers (e.g., raw carrots or whole grapes).
Using This Kit

Within this kit, you’ll find a DVD with *The Get Healthy Now Show* and other segments, plus a companion storybook that helps your children interact with what they see in the video. You can view *The Get Healthy Now Show* as you begin using this kit, and share the storybook after children have seen the DVD. The “View and Do” segments on the DVD can be used with the “View and Do” lessons (see page 8) in each chapter.

**This binder has three sections and each section has three chapters.**

**Each chapter has:**

**Group Poems/Songs**
Here you’ll find poems or songs that introduce the theme of the chapter in fun and active ways.

- Use them during large group gatherings or in meeting time.
- Make a copy for each child for use as a personalized coloring page.
- Look for specific “Say it! Do it!” suggestions, which highlight ways you can enjoy the poems and songs together.
- Use a copier to enlarge the poem/song sheets for display in your room.

**Activities and Handout Pages**
You’ll see plenty of hands-on activities that help children explore the theme of each chapter.

- Look for the list of goals to help you identify the skills children will be building.
- Easily integrate the activities into lessons about literacy, math, and more.
- Reproduce the handouts for children to use.
- Read the “Try This” section for ideas to extend learning.
“View and Do” Pages
Besides *The Get Healthy Now Show*, the kit’s DVD features a variety of *Sesame Street* video segments about healthy habits. These short segments are an exciting, interactive way to involve children.

- The “View and Do” pages involve showing children a certain segment on the DVD (use the DVD menu to select the title you need) and then doing a fun activity that explores its key messages.

The Family Newsletter
The newsletter is an appealing resource to share with families. You can use it to stay in touch with families and fill them in on everything children are experiencing in your program.

- Each newsletter highlights specific information children are learning and offers ideas for how to extend this learning at home.

- Copy the newsletter and the page that follows and send them home with your children to help everyone stay healthy and strong together!

Did You Know?
The *Did You Know?* facts are interesting bits of information to keep in mind as you help your children stay healthy each day. There’s also a *Did You Know?* fact in each Family Newsletter to help families stay informed.

At the back of this binder
- In the last pages of the binder (98-100), you’ll find important references and lists. Look here when you need a simple explanation of which foods are “sometime” or “anytime” foods, or when you need a color-coded list of fruits and vegetables.
This section offers easy and fun ideas and activities to get moving:

Chapter 1: Moving & Playing
Children explore how their bodies work and discover how it feels to jump, dance, and play together.

Chapter 2: Go & Grow
Children find ways to move every day. They explore the health benefits of moving — and how it affects their hearts, lungs, bones, and muscles.

Chapter 3: What My Body Tells Me
Children learn to listen to the signals their bodies send, so they know what they need to be happy and healthy.

Children just love to move. Physical activity is good for children’s bodies and their minds. Moving helps everyone feel good, and it supports the healthy development of our entire bodies: hearts, lungs, muscles, bones, and more.

All children need, and benefit from, at least 60 minutes of physical activity every day. You can help your children reach this goal by adding to the active play you already do as a part of the daily routine. Add several 10- to 15-minute bursts of activity to each day — it makes a difference! If you’re looking for specific ideas, the Healthy Habits for Life Child Care Resource Kit has a bunch of fun and easy activities, so you can keep your children active — even when it rains.

You set the stage — so have fun moving with your children! You’ll all be building stronger bodies and boosting the energy you’ll need for many happy, healthy days together.

Watching The Get Healthy Now Show
On the DVD in this kit, you’ll find a fun, furry story starring Elmo, Telly, Rosita, the Count — and plenty of their fruit and veggie friends! Before you begin any of the activities in this section, watch the DVD with children. Explain that these friends are singing, dancing, and learning all about staying healthy, and that they will soon be doing the same.
Chapter 1 Introduction

Moving and Playing

This chapter focuses on finding new, fun ways to move. These activities help children see that moving makes them healthy and happy.

* Did You Know?

During an average day at child care, preschoolers might not be getting enough physical activity. One study found they got only 20-25 minutes of activity that got their little hearts pumping. But you can help by scheduling more active time into every day.

In this chapter, you’ll find activities and strategies to integrate “active time” into your day (and to help families do so at home). You can model healthy behavior by moving along with the children.

› Get moving with the Move Together! poem—jump, hop, wiggle, and twist! (page 11)
› Add bursts of activity throughout the day with the Movement Grab Bag. (page 12)
› Show children that even reading can be active, as everyone moves along with Move Along! an interactive Sesame Street story. (page 13)
› Roll the Count’s Movement Cubes to combine physical activity with early math skills. (page 14)
› Celebrate the joys of moving as everyone watches the DVD segment Follow Me: Hips Dance. Don’t forget to make up your own moves and grooves. (page 17)
› Send home the Family Newsletter, which updates families on everything children have been learning and doing to keep themselves healthy and offers tips and activities for extending the learning at home. (pages 18-19)

Most of all... have fun with your children!
Move Together!

Look at me! Look at you!
Look what our bodies can do.

Dance! Dance!
Run! Run!
Moving our bodies is so much fun!
We can jump. Jump!
We can hop. Hop!
We can wiggle. Wiggle!
We can stop. Stop!
We can twist. Twist!
We can tap. Tap!
We can stomp. Stomp!
We can clap. Clap!

And we can sit...sit (whisper slowly)
And we can rest...rest
So that we can be our very best.

We whisper. We breathe.
We smile and then,
We start to move all over again!

Say it, do it! Copy this poem, post it, and use it over and over again.
Read the poem together in an area where everyone has space to move.
When you come to an “action word,” encourage children to demonstrate it. To really get moving, repeat several times.
Use a louder voice for action words, like “jump.” Whisper the “calm” words like “sit” so that children experience the difference between moving actively and calming down.
Ask children to add their own moves. Every time you come to “We can ___,” point to a child and ask her to make up a move for other children to copy. Record your new poem on a large sheet of paper.
Movement Grab Bag

Pretending to be animals helps children discover new and energetic ways to move their bodies.

*Try This!*

Use the animal cards to help children go from one activity to the next. Ask children to move like sleepy turtles when they are moving too quickly. If you need children to move faster, ask them to be “busy bees” so they can fly quickly to their coats before going outside.

**Children will:**
- Get physically active, even during transition times
- Become more aware of their bodies and how they move

**Materials:**
- Index cards or small pieces of paper
- Crayons
- Glue
- Old magazines
- Paper bag

**Ask children:**
How do animals move? Which animals move fast? Which move slowly? Which animal is your favorite, and how does it move?

**Activity:**
1. Cut animal pictures from magazines and glue to index cards, or have children draw their own animal on an index card. Put all cards in a paper bag; now you have a Movement Grab Bag.
2. At different times during the day (perhaps when children are on the way to the dramatic play area or another center), ask a child to choose an animal card from the bag.
3. Call out the animal so that children can move like this animal. Help children to name the body parts they move.
Move Along!

When children act out stories, circle time can be filled with wonderful, healthy movement.

*Try This!* Bring other storybooks to life by acting out the movement words. In “The Gingerbread Man,” for instance, you can act out “run, run as fast as you can.”

Children will:
- Act out stories
- Build listening comprehension

Activity:
1. At circle time or story time, explain that you are going to read a story that children can tell with their bodies as they move in many different ways.

2. As you read the story below, pause at the capitalized action words so the children can move like Elmo, Zoe, and Big Bird.

On the Move to Hooper’s Store

Elmo, Zoe, and Big Bird are delivering Gina’s grocery list to Hooper’s Store, and they need your help! As they are WALKING, Elmo sees a giant puddle in front of them. What should they do? Elmo thinks they should RUN through the puddle as quickly as possible, but they could get very wet! Zoe thinks they should LEAP over the puddle. Big Bird wonders if he could just take one giant STEP over the puddle with his long legs. What do you think they should do? (Ask for children’s ideas.)

Good thinking! They are almost at Hooper’s Store when a sudden gust of wind carries the list up into the air. It gets stuck in a tree! Zoe thinks she could JUMP high enough to reach the list. Elmo imagines that he could CLIMB to get to it. Big Bird thinks he could STRETCH and REACH his arm up to get to the list. What do you think they should do? (Ask for responses.)

Now they are in a humongous hurry. They all decide they need to ZOOM as fast as they can right to Hooper’s Store! How do you ZOOM? Great work!
The Count Counts Moves

Count every hop, skip, and jump with The Count. There are so many ways to move.

* Try This!

Ask one child to roll the movement cube once to see what the first move will be. Then have a second child roll the same cube. See if children can do the first move, then the second, then the first again, switching back and forth until you say, “Freeze!” You can also play this game outdoors.

Children will:
- Try different movements and label them
- Practice counting

Materials:
- Movement cube cutouts (see pages 15 and 16)
- Scissors
- Heavy construction paper
- Glue

Activity:
1. Copy pages 15 and 16, and glue each to a piece of construction paper. Cut out the cube outlines. Fold the cutout on all the black lines and glue or tape the tabs to form a cube.

2. Gather children in an open space. Have one child roll the movement cube. The movement it lands on is the movement everyone will do.

3. Choose someone to be The Count. This child will roll the number cube to figure out how many times everyone will do the movement. The Count should ask everyone to count along!

4. Repeat so that everyone has a turn to roll either the movement cube or the number cube.
Handout: Number Cube (see page 14)
View and Do:  
**Follow Me: Hips Dance**

Watch *Follow Me: Hips Dance*! Get up and move with the girl on the screen who asks us to move and shake our hips. Then play the “Follow My Beat” game to help children think about different body parts.

**Children will:**
- Imitate movements
- Move in playful ways
- Create and repeat various rhythms

**Viewing:**
Ask children to pay close attention to what they *see* and *hear* in *Follow Me: Hips Dance* on the DVD (segment #1). Encourage them to move to the music as they watch. Afterward, ask how moving made them feel.

**Materials:**
- Any classroom rhythm instruments such as rhythm sticks, tambourines, or shaking instruments

**Doing:**
1. Begin the “Follow My Beat” game by introducing a simple beat such as, “Clap, clap, clap, *hands*! (Everyone holds out their hands.) Clap, clap, clap, *hands*!” Ask children to play along.

2. Introduce a few more beats using other body parts (such as “stomp, stomp, *feet*, stomp, stomp, *feet*”) and mix in the musical instruments. Tap rhythm sticks against your feet and then against the floor. Use tambourines against your shoulders! Ask children to name the body parts they use to make their beats.

3. Children can take turns introducing new beats for the class to try.

4. Let children dance and move as they improvise with their instruments.
Hello, families!
In our program, we love to get moving.

In the program, children have been:
Moving their bodies in different ways, grooving to new songs and acting out stories.

You and your child are partners:
Being active is something children are usually very good at, but sometimes they need a little encouragement from all of the adults who love them.

Did You Know?
Your preschooler might not be getting as much physical activity as you think. One study shows that on an average day they get only 20-25 minutes of the kind of activity that gets their little hearts pumping! But you can help! Encourage more play and keep moving — so it all adds up to at least 60 minutes a day.

We’re exploring all of the ways that moving is fun and healthy, and we found out that it makes us happy, too.

You can help at home!

Try these creative moves to liven up your time at home.

Animal Moves As your child is picking up his toys, call out the name of a fast-moving creature, like a bee, and move like that creature as you work together. As you are getting ready for bed, you might move like an elephant or a turtle to help your child calm down. (We’ve been doing this in school. Ask your child about it.)

Story time can be an active time, too!

Action Tales In our group, we’ve been moving along to the actions of stories. The next time you’re sharing your child’s favorite book, move along! For instance, if someone in the story is running, you and your child can run in place. If children in the book are dancing, dance along. You can also make up your own action stories together. Go on an adventure as you jump over a puddle, crawl under a bush, and spin around on a windy beach.
Move to Me Maze

You and your child can help Big Bird get to his friend Snuffy.
Have your child follow the path with his finger. Each time he comes to Big Bird, you can both do the move that Big Bird is doing. Then keep on going. (You can also use a game marker, such as a piece of paper or a small block, so children don’t lose their places.) Once you get to Snuffy, it’s time to celebrate! Use the moves in any order to make up your own Funny Family Dance.

START

run
jump
fly
balance

STOP

skip
run
Chapter 2 Introduction

Go and Grow

This chapter offers ways to teach children how being physically active affects their bodies. Help children see how moving quickly gets their hearts pumping – and all that pumping makes their hearts stronger.

*Did You Know?*

When children play, they’re practicing important skills, such as running, throwing, and kicking. Once they master those, they can move on to more difficult skills, like hopping on one foot.

Mix it up with a variety of activities, such as nature hikes and stretching, to keep children’s bodies growing healthy, flexible, and strong. Most of all, encourage children to move in different ways and play a lot every day. Moving for at least 60 minutes each day is the goal. To keep children moving, build on the active time that’s already in their routine. If you’d like to add shorter bursts of activity, aim for at least 10-15 minutes. It can really add up.

Children love to be in charge – and they can be when you present them with healthy options (Apple or banana? Hokey Pokey or jump rope?). In this chapter, you’ll find ideas for staying physically active each day – even when it’s pouring rain outside.

- Learn how dancing up a storm quickens breathing and heart rates in *The Heart Dance*. (page 21)
- Dance to *Hokey Pokey Muscles and Bones* and learn what’s inside the body. (page 22)
- Learn how to keep moving even when it rains with *Raindrops Can’t Make the Action Stop!* (page 23)
- Watch *Get Up and Move!* to send the message that it’s good to be physically active a lot every day. (page 25)
- Play *Telly’s Triangle Tag* to stay active AND learn about shapes. (page 26)
- Send home the *Family Newsletter* to share how much you’ve been moving and grooving at school – and to let families know how they can keep the fun going at home. (page 27)
The Heart Dance

Wiggle, wiggle, wiggle.
Jiggle, jiggle, jiggle.
Dance, dance, dance.
(Now dance really fast!)

Prance, prance, prance.
Hop, hop, hop.
Stop, stop, stop!

Feel your lungs
breathe in and out,
As you laugh and sing
and dance about!
Now here comes the resting part,
Stop right there and
feel your heart.
Is it beating fast?
How do you know?
When you’re ready to move
say, “Go! Go! Go!”

Say it, do it! Sing and dance!
As children dance together, they will learn that moving their bodies makes their hearts and lungs work harder, and this keeps them strong and healthy.

- Lead children in the actions listed in the song.
- Help them notice their quicker breathing and heart rates and guide them to understand that movement causes a change in heartbeat.
- To work on rhyming skills, shout out the rhyming word at the end of each line (out/about, part/heart, and so on).
Hokey Pokey Muscles and Bones

Children dance as they sing this variation on “The Hokey Pokey,” which can help them think about what’s inside their bodies: bones and muscles.

* Try This!
Have children make up their own words to the song. Try singing a verse about the heart! How would that go?

Children will:
- Feel some of the muscles and bones in their bodies
- Label body parts as they move

Ask children:
- Where are your bones? What do they feel like? Please show me your knee bone. Can you feel the small bones in your wrists and fingers?
- Now, please show me the muscles in your arms. Where are your leg muscles? (Encourage children to show how strong they are by flexing and relaxing their muscles.) Your tongue is a muscle, too! Did you know that your heart is also a muscle? You can’t feel it the way you feel arm muscles, but you can feel it beating.
- Did you know that you need your muscles to move your bones?

Activity:
Form a circle and face one another with room to move. Sing and act out the song below.

You put your hand bones in.
You take your hand bones out!
You put your hand bones in,
And you move them all about.
You do the Hokey Pokey and
You turn yourself around!
Bones are what it’s all about!

You put your knee bones in.
You take your knee bones out!
You put your knee bones in,
And you move them all about.
(repeat chorus)

You put your toe bones in.
You take your toe bones out!
You put your toe bones in,
And you move them all about!
(repeat chorus)

You put your leg muscles in, You take your leg muscles out!
You put your leg muscles in,
And you move them all about.
You do the Hokey Pokey and,
You turn yourself around!
Muscles move us all about!

You put your stomach muscles in, You take your stomach muscles out!
You put your stomach muscles in,
And you move them all about!
(repeat chorus)

You put your shoulder muscles in, You take your shoulder muscles out!
You put your shoulder muscles in,
And you move them all about!
(repeat chorus)
Raindrops Can’t Make the Action Stop!

It’s a rainy day?
That’s okay! Children can find plenty of indoor ways to get the heart pumping and lungs working.

Children will:
- Recognize they can be active even if they can’t go outside
- Discover many fun ways to be active indoors

Materials:
- Copies of raindrops on page 24
  (one per child and a few extra for you)
- Pencil or marker
- Bucket (or any plastic container)

Activity:
1. In advance, write each rainy day idea listed below on the back of a raindrop. Children can each color a raindrop. Gather ideas from children, as well.

2. When it rains and you are not able to go outside, help children learn that a little rain doesn’t mean they can’t play and move. Ask children to take turns picking a raindrop from the bucket.

3. Read the activity aloud to the children so everyone can move.

Rainy Day Activity Suggestions (to write on the raindrops):
- Jump (using both feet) up and down in place with your arms above your head! Now jump faster with your arms out to the side. Stop!
- Start a parade! Form a line and march around the classroom with your strong marching legs. Take turns being the parade leader and introduce new marching moves.
- Turn on some fun music and do a happy dance to chase the rain away!
- It’s time to stretch! Do some simple stretches or try some yoga together. Try standing like a tree, then bend forward to touch your toes. Now place your hands and feet apart on the floor to make an upside down V (this pose is called Downward Dog). Try other yoga animals like cat, frog, or snake, or make up your own!
- BE the weather! Move like the rain, swirl like the wind, stomp like thunder.
Handout: Raindrops (see page 23)

rainy day activity

© 2007 Sesame Workshop. All rights reserved.
View and Do: Get Up and Move!

Watch Get Up and Move and create an Activity Spinner for the classroom. Use the spinner when you need a burst of activity, so you can all make sure to move as much as possible each day.

*Try This!

Help children remember the sequence of their activities based on color category. (“First, we did a red activity, then blue, then orange,” and so on.)

Children will:
- Talk about the ways they like to move
- Learn that physical activity makes our bodies healthy and strong
- Use colors to group activities

Materials:
- Large paper plate (Use colored markers to divide the plate into four equal triangular sections in four different colors — red, orange, green, and blue. Label the sections Red: Get Strong!, Orange: Move a Lot!, Green: Raise Your Heart Rate!, and Blue: Streeeeetch! Make a dime-size hole in the center of the plate.)

Viewing:
Watch Get Up and Move! on the DVD (segment #2).

Doing:
1. Ask one child to place his index finger (or crayon) through the hole in the plate, fingertip against the wall or table. This child can spin the plate while a friend marks a spot on the wall or table with his finger.

2. When the spinner stops spinning, see which color is next to his finger. You choose an activity from the list and call it out so children know what to do!

Movement Ideas

Red: Get Strong!
- Arms: push-ups (with knees touching ground) • Crab walk
- Legs: Knee bends • Walking on tiptoes
- Abdomen: Row, Row, Row Your Boat

Orange: Move a Lot!
- Nature hike • Cleanup (chores) • Parade • Follow the Leader • Simon Says

Green: Raise Your Heart Rate!
- Tag • Jumping jacks • Outdoor play • Dancing • Soccer

Blue: Streeeeetch!
- Shoulders: roll shoulders front and back
- Arms: clasp hands and reach front, back, and overhead
- Hands and wrists: close hand in fist, open hand, and spread fingers
- Legs: touch toes • Feet: point and flex
- Back: sit and twist • Cat stretch
Telly’s Triangle Tag

Did you know that Telly Monster loves triangles? This *Sesame Street* spin on the classic game of Freeze Tag will help children learn about triangles as they play together.

**Try This!**

During circle time, invite children to make shapes with their bodies:
- **Square or diamond:** By sitting with legs spread into a V shape and touching feet with another child.
- **Circle:** By curving arms into a circle overhead.
- What other ways can children make shapes with their bodies?

**Children will:**
- Engage in vigorous movement
- Learn that triangles have three sides

**Activity:**

1. Gather outside or in a large play space. Ask children to name their favorite shapes and discuss how many sides common shapes have. Remind them that the triangle is Telly Monster’s favorite shape. Explain to children that Telly’s Triangle Tag is just like Freeze Tag where one child will be “It” and he or she will tag other children to freeze them.

2. Children can take turns being “It,” and you can play, too! Start off by being “It,” and as you tag children, say “Freeze!” Once children are frozen, they stay in their place with their hands touching at the wrists, forming a V.

3. Any child can unfreeze their “frozen” friends at any time by making the V into a triangle by putting their hands across it to make the third side of the triangle.
Hello, families!
In our program, we are moving to keep our bodies strong and healthy!

In the program, children have been:
   Learning about different body parts, exploring their heartbeat, and breathing and discovering ways to stay active – even on rainy days.
   As they move and explore, children are also learning about shapes, colors, sequencing, and rhyming.

* Did You Know?
   When children play, they’re practicing important skills, such as running, throwing, and kicking.
   Once they master those, they can move onto more difficult skills, like hopping on one foot. Lots of play time means lots of time to practice. Before you know it, your child will be saying, “Look at what I can do!”

Children are learning that something they already love to do is also very good for them.

You can help at home! Pediatricians and health experts agree that children need at least 60 minutes of physical activity every day. (Preschoolers will not usually understand time in this way. They just need to focus on moving and playing as much as possible every day.)

Be active right from the start.
   - J Is for... Make jumping jacks part of your morning routine. At some point before leaving the house, say, “J is for jumping jacks!” and count along as your child does 10 jumping jacks. Do the same for other letters of the alphabet.
   - Stairs can be a healthy way to travel!
     - Up, Up, and Away Forget about the elevator or escalator – take the stairs. Walk when you can, or hold hands and move really fast with your child as you “run” your errands.
Activity Chart

Cut out the Activity Chart below and put it on your refrigerator at a level your child can reach.

At different points each day when you and your child need to move, you can play “Magnet Mystery Move!” together. Take turns closing your eyes and placing a magnet on the chart. (If you don’t have a magnet, just use your finger.) Which section did you choose? Pick a movement activity from this list and move together. Now close your eyes and choose again.

- Stomp!
- Jump!
- Run!
- Hop!
- Cycle your legs!
- Dance! Swim!
- March!
- Wiggle!
- Walk! Zoom!
- Twist!
- Do jumping jacks!
- Hula! Skate!
- Stretch!
Chapter 3 Introduction

What My Body Tells Me

Children have been learning that it feels wonderful to move and that moving is also very important in keeping the body healthy and strong. Now children can focus on listening to what their bodies tell them. They can learn to think about their bodies as machines that need energy to run well, just as a car needs gas.

* Did You Know?

Many young children don’t get enough sleep — and without enough sleep, children aren’t at their best. Create a peaceful environment for naps, and provide a good balance of activity and rest.

In simple ways, children can begin to understand the idea of balancing the right amount of healthy food with the right amount of physical activity:

▶ Help children tune in to how their bodies are feeling with the Listen to Your Body poem. (page 30)

▶ Show children how good it feels to stretch their muscles in Sesame Super Stretch Game. (pages 31-32)

▶ Encourage children to think about when to move, when to rest, when to let their energy out, and when they need to eat healthy foods and keep moving so they can think and play, with the activities Energy Dance and the Feel Good Mask. (pages 33-35)

▶ Watch the DVD segment Super Wendy and then create an Energy City where children can pretend to refuel their own super bodies. (page 36)

▶ Send home the Family Newsletter to help families create a healthy home for their children. This newsletter offers ideas for a balanced lifestyle and tips for healthy eating habits, as adults support children’s energy needs at home. (pages 37-38)
Listen to Your Body

Listen to your body, (whisper)
Listen to your body, (louder)
Listen to your body, (really loud!)
As you jump, jump, jump!

Listen to your heart, (whisper)
Listen to your heart, (louder)
Listen to your heart, (really loud!)
And hear it pump, pump, pump!

Listen to your stomach, (whisper)
Listen to your stomach, (louder)
Listen to your stomach, (really loud!)
Does it say, “I’m hungry” or “I’m full”?

Listen to your body, (whisper)
Listen to your body, (louder)
Listen to your body, (really loud!)
What is it telling you?

Say it, do it! After reading the poem with children, ask them to listen to their own bodies. How are they feeling? (They may be breathing harder, feeling warmer, or noticing a faster heartbeat.) Why might they be feeling this way?

Tired? What should they do?
Energetic? What can they do to use their energy?
Hungry? Thirsty? What can they do?
Do this activity at various times of the day: first thing in the morning, before lunch, after outside play, and so on. Pay attention to the way time of day affects how kids feel.
Sesame Super Stretch

Stretching keeps us flexible, which means we're able to move and bend our bodies easily – without tightness or pain. Most kids are pretty flexible, but they still can enjoy the best part of stretching: It feels great!

* Try This!
After sitting still in circle time, this is a great way to get children up and moving.

Children will:
- Stretch their bodies in a variety of ways
- Learn that stretching helps “wake their bodies up”
- Mirror movements they see in pictures

Materials:
- Sesame Super Stretch Chart (copy page 32)
- Small block

Ask children:
Can you pretend you are waking up in the morning? How does your body feel? Now pretend you are sitting in the car for a long time. How do you feel? How does your body feel right now?

Activity:
1. Do some warm-up exercises (run or jump in place).
2. Introduce different stretching moves:
   - Stretch UP! (reach up to the ceiling)
   - Stretch DOWN! (reach down to your toes)
   - Stretch all AROUND! (hold your arms out to the sides and move them around slowly in BIG circles)
3. Have children take turns tossing the block onto the Stretch Chart to see which stretch it lands on. All children then stretch the way their Sesame Street friend is stretching on the chart.
4. Ask, “What does it feel like after you stretch your muscles? Check your body – are there any spots you want to stretch more so you can move more easily?”
Reach!
Bend!
Wiggle!
Touch your toes!
Energy Dance

Children can begin to understand how food gives them energy and that they use that energy for physical activity. Help children understand that, like a car, we need fuel to go.

Children will:
- Learn that food gives us energy
- Dance to music
- Engage in pretend play

Materials:
- Food cards (copy page 34 and cut along lines)
- Scissors
- Music (any CDs or tapes you listen to in your program)

Ask children:
What is energy? What does energy help you do? What do we put in a car? (Explain that gas keeps a car moving and food keeps us going because it gives us energy. We need to eat healthy foods to have the energy to move and play each day.)

Activity:
1. Gather children in an open space, and give each child some food cards.

2. Turn on music and dance! Turn the volume down gradually, and tell children to slow their movements to match the music. They are pretending to run out of energy.

3. Turn the volume down even more as children slow their dancing. When the volume is so low that children can’t hear the music anymore, they have completely “run out of energy.” They need to pretend to eat their healthy foods.

4. Now crank the music up again and DANCE with lots of energy.
### Handout: Food Cards (see page 33)

<table>
<thead>
<tr>
<th>Oranges</th>
<th>Eggs</th>
<th>Broccoli</th>
<th>Whole-grain sandwich</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lowfat cheese</td>
<td>Tomatoes</td>
<td>Lowfat milk</td>
<td>Pineapple</td>
</tr>
<tr>
<td>Whole-grain rice</td>
<td>Avocado</td>
<td>Carrots</td>
<td>Bananas</td>
</tr>
<tr>
<td>Lowfat yogurt</td>
<td>Fish</td>
<td>Apples</td>
<td>Peas</td>
</tr>
</tbody>
</table>

---

© 2007 Sesame Workshop. All rights reserved.
Feel Good Mask

Children can explore how they are feeling as they use their energy masks and think about why they might be feeling this way.

Children will:
- Think about how their bodies are feeling
- Communicate their feelings to one another
- Explore ways to balance rest and activity

Materials:
- Large paper plates (one per child)
- Crayons or markers

Activity:
1. Help children make “feel good” masks to show how they are feeling. On one side of the plate, children draw a face that looks tired; on the other side, children draw an energetic, happy face. As children color, discuss why someone might be feeling tired or happy and energetic.

<table>
<thead>
<tr>
<th>Feeling Good</th>
<th>Feeling Bad</th>
</tr>
</thead>
<tbody>
<tr>
<td>• I ate a healthy meal</td>
<td>• I didn’t eat breakfast</td>
</tr>
<tr>
<td>• I got a good night’s sleep</td>
<td>• I went to bed late</td>
</tr>
<tr>
<td>• I played ball with my friends</td>
<td>• I sat around all day and did nothing</td>
</tr>
<tr>
<td>• I ran with my friends</td>
<td></td>
</tr>
</tbody>
</table>

2. During circle time use the energy masks to role play. Ask children to take turns putting their masks up to their faces to show how they are feeling. Are they tired and s-l-o-w, or are they feeling ENERGETIC? Why? What might help if they are feeling tired? Maybe a healthy snack.

3. Send the masks home with children so they can help their families understand how they are feeling.
View and Do: Super Wendy!

Children watch *Super Wendy* eat just the right amount of healthy food for energy. Children can explore how they can have “super energy” too, by eating healthy foods and being physically active.

* Try This!
Choose a spot in the classroom to be the “Saving for Later” place where children can store their food blocks until they need more energy later.

Children will:
- Explore ways healthy foods and drinks give us energy
- Practice listening to their bodies

Materials:
- Crayons
- Food cards (copy page 34)
- Blocks
- Tape

Viewing:
Watch *Super Wendy* on the DVD (segment #3) together. Explain to children that when they are finished watching, they can build their very own Energy City, a place where each child can pretend to be a superhero like Super Wendy. (Point out that all superheroes need healthy foods and sleep.)

Doing:
1. Choose a certain space for Energy City, like the block center. Children can color the food cards and then tape them to blocks. They can now use these blocks in their Energy City.

2. Encourage children to pretend to be superheroes! You can call them by their superhero names (such as Super Marco! or Super Rebecca!).

3. As they build their city, suggest that kids include a Resting Space in the city where children can go to take a break if they are feeling they need more energy; an Active Place where they can run, climb, and fly; and a Healthy Food Stop where they can pretend to eat the healthy food blocks they’ve made to boost their energy. When children are pretending to eat, remind them to stop when they feel full, just like Super Wendy.
Hello, families!

We’ve been busy listening to our bodies!

In the program, children have been:

Listening to their bodies, stretching and dancing as they explore energy and the importance of getting the right balance of healthy foods, physical activity, and rest.

Did You Know?

Many young children don’t get enough sleep – and without enough sleep, children are not at their best. Preschoolers need about 11-12 hours, including nighttime and naps.

Your child is learning to listen to what his body may be saying, like:

- “I’m tired. I need to rest.”
- “I’ve been sitting for a long time. I need to move my body!”
- “I’m hungry. I need to eat a healthy snack, please!”
- “I’m full. It’s time to stop eating.”

This allows us to balance our “energy in” (the food we eat and the sleep we need) with our “energy out” (the energy we use running, playing, working, and so on).

You can help at home! For children to move, think, and play at school, they need energy when they get here. They can get this energy from eating healthy foods, sleeping to restore their bodies, drinking water, and staying active throughout the day.

Healthy Eating Tip

Preschool children need to have regularly scheduled, healthy meals and snacks. Offer your child the right fuel to keep him or her going between meals, such as fresh fruit, vegetables, whole grains, and low-fat dairy products. By fueling their bodies this way, children don’t become too hungry, which can lead to overeating. Limit sugar-sweetened beverages and turn off the TV while eating.
Recipe for a Healthy Weekend

Put this list on your refrigerator, and refer to it during the weekend to be sure you’re on a healthy track.

- Eat meals as a family
- Limit TV time
- Eat fruits and vegetables
- Take a walk outside together
- Read a book inside together
- Get a good night’s sleep
This section offers easy and fun ideas and activities to help children learn about fruits, vegetables, and other healthy foods.

Chapter 1: Nutritious and Delicious!
Children explore wonderful, colorful foods.

Chapter 2: Making the Healthy Choice
Children discover what makes a healthy meal or snack. They begin to understand that they can eat certain healthy and nutrient-rich foods anytime, but high-fat, sugary foods should be eaten only sometimes.

Chapter 3: What My Body Tells Me
Children learn how to pay attention to their bodies’ signals. Are they hungry? Full? What should they do with each of these signals?

Healthy food keeps us happy and strong! There are so many foods to choose from, but which are best for growing children?

You can guide children to the right choices by helping them learn about healthy eating and allowing them to choose from a variety of nutritious foods. You’ll also learn how to help children understand important body signals – like feeling hungry or full – and simple ways to express these sensations.

Food is colorful and it’s delicious. Enjoy it together!
Chapter 1  Introduction

Nutritious and Delicious!

This chapter focuses on celebrating all of the healthy foods that give children the fuel they need to play and grow.

* Did You Know?
A child might have to try a new food ten or more times before he accepts it. In other words, even if a child says “yuck” at first, he might still end up liking that food. You can help by encouraging children to taste new foods.

Healthy food is delicious and naturally comes in many colors — the more colors you have on the plate, the more nutritious your meal is.

- Chant “I Say Fruits and Vegetables” and think about healthy foods together. (page 41)
- Play with the Mystery Food Box to help children explore different healthy foods. (page 42)
- Notice the colors of different healthy foods in I Eat the Colors of the Rainbow. (page 43)
- Discover different food combinations as you build healthy salads together. (pages 44-45)
- Move and chant “Pick and Pull” together as children think about where fruits and vegetables grow. (page 46)
- Send home the Family Newsletter, which updates families about everything children have been learning and offers ideas for healthy eating at home. (page 47)

Most of all... enjoy healthy food with your children!
I Say Fruits and Vegetables

We eat a rainbow of colors every day.
They help make us strong so we can play!

I say red.
We say apples and cherries!
I say blue.
We say big blueberries!
I say green.
We say zucchini would be yummy!
I say purple.
We say plums will please our tummy!
I say yellow.
We say squash would be nice!
I say orange.
Let’s have a carrot by the slice!

We eat a rainbow of colors every day.
They help make us strong so we can play!

Say it, do it! 
Copy this poem, post it, and use it over and over again. Say the poem together in an area where everyone has the space to move.

When you come to a fruit or vegetable, encourage children to strike a pose. If you say cherries, children might ball up on the floor. If you say carrot, they might stand up on their tiptoes. Name various movements rapidly so children are moving around!

Add your own colorful foods to the poem. Say the first part of each line (“I say red…” or “I say green…”) and encourage children to call out their own healthy red or green fruits and vegetables.
FOOD AND DRINK TO GROW ON :: CHAPTER 1 :: NUTRITIOUS AND DELICIOUS!

Activity

**Mystery Food Box**

Children can begin to understand what “healthy food” means by exploring the variety of foods that make up a healthy diet and talking about the foods they like.

*Try This!*

When finished, wash and cut up fruits and vegetables and have a taste test during snack time. This is a great opportunity to explore foods from around the world.

**Children will:**
- Use their senses to explore healthy foods
- Learn about the health benefits of different foods
- Taste fruits and vegetables

**Materials:**
- An assortment of real fruits and vegetables, whole grains, and lowfat dairy products
- Empty cardboard box (cut a hole in it so children can reach inside)
- Scissors

**Ask children:**
What’s your favorite vegetable? Your favorite fruit? When do you drink milk? When do you eat yogurt and cheese?

**Activity:**

1. Show children the foods you have brought (e.g., an apple, banana, orange, cucumber, broccoli, yucca, bok choy, small piece of cheese, whole wheat pita, empty yogurt container, clean dry lowfat milk carton, etc.) and talk about their colors and shapes. Tell children that this box is a healthy food box.

2. Turn around so children can’t see what you are hiding in the box and place a fruit or vegetable inside the box.

3. Encourage children to take turns reaching inside the box, feeling the food (or the container it’s in) inside, and guessing what it is. Ask the child to describe what he feels to the other children. Is the food smooth? Bumpy? Is it big or small? What could it be? What makes you think that’s what might be inside?

4. Open the box and show the food inside. Discuss the health benefits of each food.
View and Do: *I Eat the Colors of the Rainbow!*

Children can think about what they are eating and understand that colorful fruits and vegetables are good for them because they have lots of vitamins and other nutrients.

*Try This!*

Say this cheer together and ask a child to point to the colors on the Healthy Food Rainbow as you cheer:

**Red! Orange! Yellow! Purple! Green! Blue!**

They give you vitamins to help you grow. (reach up to the sky)

And the energy you need to go, go, go. (jump around to show your energy)

Children will:
- Explore the different colors of fruits and vegetables
- Sort items by colors

Viewing:

Watch *I Eat the Colors of the Rainbow* on the DVD (segment #4). Have children see how many different colors they can identify.

Materials:
- Construction paper (red, orange, yellow, green, blue, and purple)
- Crayons in a variety of colors
- Tape
- Magazines and/or food circulars
- Scissors

Doing:

1. Post the colored paper along the wall — red, orange, yellow, green, blue, purple. Make sure it is low to the ground in an area that all children can easily access. Explain that together children will work to create a Healthy Food Rainbow.

2. Point to a color and ask, “What vegetables or fruits are this color?”

3. Ask children to find and cut out of a magazine or draw a fruit or vegetable (see full list on pages 98-99). Throughout the week, help children add their healthy food creations to the rainbow wall, posting each one on the color that matches. “Where does broccoli go?...On the green square, right!”

   **Red & Pink:** apples, cherries, strawberries, tomatoes, watermelon
   **Yellow & White:** bananas, squash, pineapple, corn
   **Green:** beans, peas, lettuce, grapes, pears, broccoli
   **Orange:** oranges, carrots, peaches, cantaloupe
   **Blue & Purple:** blueberries, plums, grapes, eggplant

4. Ask children to gather in front of their beautiful rainbow. What healthy foods do they see? All those colors mean so many vitamins and minerals that are good for our bodies.
Build Me a Salad

Now that children have thought about healthy fruits and vegetables and learned about eating colors, they can create their own healthy salad.

⁎ Try This!

Have a salad bar day and have each child bring in a different salad ingredient, and then bring their recipes to life! Encourage children to taste all the different fruits and vegetables.

Children will:
- Practice counting and writing numbers
- Explore different ways to combine healthy fruits and vegetables

Materials:
- Copies of page 45 (one per child)
- Crayons or paint

Activity
1. Have children sit in small groups at tables with crayons and paint. Let them know they will be creating their very own healthy salads.

2. Encourage children to use a crayon to circle each fruit or vegetable they would like to include in their healthy salad. It’s okay to mix fruits and vegetables – grapes and apples are delicious with lettuce in a salad! Ask, “What green vegetable are you going to put in your salad? How about a red fruit? What tasty red fruit can you add?”

3. When children have circled the fruits and vegetables they want to include in their salads, ask them to count how many foods they have circled.

4. Go around to each child and help them write the number on their paper: 6 healthy foods! 7 healthy foods! and so on.

5. Now ask children to paint or color the fruits and vegetables on this page and ask them to think about the colors they need for each food.
's Healthy Salad

I put ______ different fruits and vegetables in it.

lettuce  carrots  tomato  avocado  apple  orange  cucumber  pear
Pick and Pull

Children can think about where healthy foods come from and move their bodies to show where the foods grow. Do we pull them from the ground or pick them from a tree or a bush?

* Try This!

Explore what happens next — after farmers pull those carrots up. (The carrots travel on a truck to the store and your family buys them, cleans them, and cuts them up to eat.) Invite children to act out the different steps in sequence. What happens first? Next? Last?

**Children will:**
- Think about how different fruits and vegetables grow
- Move their bodies in fun ways
- Build spatial awareness

**Ask children:**
Where do fruits and vegetables come from?
We buy them in a store, but where do they grow?
What fruits can you think of that grow on trees?
What foods grow in the ground?

**Activity:**

1. Ask children to close their eyes for a moment and really imagine they are standing under an apple tree — how high do they have to reach for an apple? When they pull from the ground, can they picture the carrot in the dirt? How about a big raspberry bush; how far forward do they have to reach?

2. Encourage children to think about how high they can stretch their arms when they PICK, PICK, PICK and how low they can go when they PULL, PULL, PULL. Try pretending you are all in a big field — you can call out between lines, for instance, “Now let’s run (in place) to the orange tree!”

**Pick and Pull Song**

I see an apple tree. Reach up and PICK! PICK! PICK!
I see a mango tree. Reach up and PICK! PICK! PICK!
I see a blueberry bush. Reach in front of you and PICK! PICK! PICK!
I see a raspberry bush. Reach in front of you and PICK! PICK! PICK!
I see a carrot. Reach down and PULL! PULL! PULL!
I see a potato. Reach down and PULL! PULL! PULL!
Hello, families!
In our program, we have been learning all about delicious, healthy foods.

In our program, children have been:
Singing about healthy foods and learning that “eating their colors” is fun, nutritious, and delicious.

As they explore healthy eating, children have also been learning about numbers, counting, identifying colors, and engaging in pretend play.

* Did You Know?
Young children may need to try a new food more than 10 times before they learn to like it, so put a little on the plate, and ask your child to just taste it.

We've been exploring what foods look like in all their gorgeous, bright colors and we've tasted these healthy, colorful foods as well.

You can help at home! There are so many healthy foods to try and explore.

Activity ideas:
* Rainbow Parfaits We've been learning that colorful foods are healthy foods, so enjoy this snack together.

What you need:
Plain or vanilla-flavored lowfat yogurt
Colorful cut-up fruit (strawberries, peaches, kiwi, blueberries, bananas, etc.)
Crushed graham crackers
Clear plastic cups

What to do:
In each cup, make layers of yogurt, fruit, and crushed graham crackers.

* Colorful Menus Plan a meal with your child that includes at least three different colors, like red peppers, black beans, and brown rice. Buy the items together. While you're preparing the meal, have your child create a dinner menu or draw a plate with all the foods on it. Display the menu near the table, if possible. Have your child count up all the colors on the plate.
Great Grocery Shopping Tips

When you’re grocery shopping, focus on the outermost aisles of the store. Often, that’s where you’ll find the healthiest foods, such as fresh produce, dairy products, meats, and seafood. Head down the other aisles with a plan for what you want, instead of giving your child the chance to spot sugary cereals, unhealthy snacks, or other foods you don’t want to buy.

**Involve your child as you shop:**
- Let your child push a kid-size cart, if the store offers them.
- Give your child a small list of items (from your master list) to look for and check off as they’re found.
- Challenge your child to select a new food to try, focusing on fruits, vegetables, whole grains, or lowfat dairy products.
- Play “I Spy Colors” to find all the red foods, the green foods, etc.

**Try This!**

Pretend you are running a Healthy Family Restaurant at home. You can start at the grocery store by shopping for healthy foods. Ask your child what you should name your family restaurant.
Chapter 2  Introduction

Making the Healthy Choice

This chapter focuses on helping children make healthy choices each day. When given the chance to choose from two healthy foods, children can feel proud of themselves for making a healthy decision.

* Did You Know?
Children who get five servings of fruits and vegetables each day are more likely to get the nutrients they need.

Adults play a very important role in helping children understand the nutritional value of foods and drinks. You don’t want to overload them with information, but children can explore the differences between healthy and less healthy foods and drinks. Help them understand that healthy foods and drinks are great anytime, while less healthy foods and drinks should be enjoyed only sometimes. You can also help children count how many fruits and vegetables they are eating each day. Aim for at least 1, 2, 3, 4, 5!

- Begin by making a meal for a monster and pay attention to the rhyming clues! (page 50)
- Watch Cookie Is a Sometime Food on the DVD and then help children learn the difference between sometime foods and anytime foods. (page 51)
- Encourage children to think about their favorite healthy foods as you do the Anytime Apples activity together. (page 52)
- Create a Sometime/Anytime Café and help children plan the menu, name the restaurant, and decide what they will need to do. (page 53)
- Think about the many ways to combine delicious fruits and vegetables to add up to five. (page 54)
- Send home the Family Newsletter to help families foster healthy eating habits at home! (page 56)
A Meal for a Monster & Me

Copy this page (one per child) and ask children to circle or color in the meal they’d like to eat.

Grover, Elmo, and Zoe are really hungry, but they need your help to decide what to eat. Please listen to their rhymes so you can help choose the delicious and healthy meal that you like best. Point to the healthy meal each monster might like to eat as much as you do.

It’s breakfast time! Let’s choose a nice healthy meal.
Should we choose whole-grain toast and an orange?
Or oatmeal and banana with its cute yellow peel?

It’s time for lunch! We need healthy food to eat.
Should we choose chicken with salad? Or turkey on whole wheat?

Let’s choose a healthy dinner! Do you know what I mean?
Should we choose soup, bread, and tasty veggies? Or chicken, brown rice, and something green?

After you’ve listened to the rhymes and chosen meals for Grover, Elmo, and Zoe, ask children what they think Telly, Oscar, and Rosita should eat. Make sure their meals include fruits or vegetables — or both.
We need to stop and think before we eat foods with a lot of sugar, fat, and salt. But anytime foods have all of the nutrients we need to grow, play, and learn.

*Try This!*
Help children understand anytime foods by thinking about activities we do every single day. We brush our teeth and wash our hands every day; children can pretend to brush their teeth and wash their hands. Then explain that we can eat anytime foods, such as apples, lowfat milk, and carrots, every day.

Children will:
- Learn the difference between a sometime food and an anytime food
- Practice labeling foods as sometime and anytime

Viewing:
Watch *Cookie Is a Sometime Food* on the DVD (segment #5).

Ask children:
- Help me think of some other foods and drinks like cookies, soda, chips, and french fries that we only eat sometimes.
- What are some of the healthy foods we’ve talked about so far?
  - What are some healthy drinks?
  - What vegetables do you like to eat? What fruits?
  (Write answers on big paper with sometime foods in red and anytime foods in green.)

Doing:
Help children to think about sometime and anytime foods.

Materials:
- Old magazines/supermarket circulars
- 2 large pieces construction paper
- Tape or glue stick
- Scissors
- Paper and crayons

Activity:
1. Before beginning, cut out pictures of healthy anytime foods and sometime foods. Use the Sometime/Anytime Food List for your reference (page 100). Show children the sometime and anytime foods you’ve found.

2. Together, tape or glue the pictures onto construction paper (labeled “sometime” and “anytime”) to make sometime and anytime food collages.
Anytime Apples

An apple a day helps us live the healthy way. In this taste test activity, children can decide which apples they love the most.

* Try This!

Try the following rhyme with children to remind them that not only are apples delicious, they are also anytime foods.

Apples, apples, we love you! You taste so good and you’re healthy too.
You’re green and yellow and Red Delicious,
You’re crunchy and colorful and so nutritious!
We love apples!

Children will:
- Participate in graphing activity
- Notice similarities and differences in a favorite anytime snack

Materials:
- A variety of apples
- Plates
- Large sheet of paper
- Markers

Activity:
1. Ask children to bring in their favorite apple or bring in a few different kinds of apples yourself (try for a variety of red, green, and yellow). Tell children they are going to be “apple researchers” – they will find out how many kids like each different type of apple.
2. Cut up the different types of apples and place each type of apple on a plate.
3. Ask children to taste each apple and record their favorites on a large sheet of paper. Help children make a graph to display the voting results. Do they like red the best? Yellow? Green? Which color apple did most children choose as their favorite?
4. You can also check children’s favorite types of apples. Within the red apple group, did children like Red Delicious the best? Fuji apples? Macintosh?
5. Healthy snack time – eat the apples!
The Sometime/Anytime Café

Plan a grand opening of a healthy restaurant right in the play area! Children can think about what they need for their restaurant and work together to make the restaurant a healthy and delicious success.

* Try This!

Play the DVD segment “Breakfast Is the Best Meal of the Day” (#6) as families drop children off. Invite families to visit the children’s pretend restaurant for breakfast. Children can take their orders and “serve” them healthy and delicious food.

Children will:

- Name and identify healthy foods and drinks
- Explore healthy eating through pretend play
- Develop print awareness through menus, labels, and signs

Materials:

- Large white paper (two pieces)
- Plastic healthy foods (fruits/veggies/milk/juice)
- Ask children’s families to send in empty food containers (use healthy food containers and safe containers like boxes; avoid cans)

Activity:

1. During a group gathering, tell children that today they get to build a new restaurant. They can think of a name for their restaurant, make a sign, and create a menu together.

2. Use one of the large white pieces of paper to start a menu. Ask children to help you make a list of some healthy food choices (anytime foods) such as a grilled cheese sandwich on whole-grain bread, a salad, broccoli and carrots, lowfat yogurt, lowfat milk, water, etc. and have children choose. What sometime foods would children like to include? Make sure that there are more anytime foods on the menu than sometime foods.

3. Ask: What should we name our restaurant? Work together to make a colorful sign using the other piece of paper. Then, have a grand opening! Hang the sign in the pretend area. Children can take turns running the restaurant or being the customers. Talk with the children as they pretend to be customers. For example, “Oh, you chose some of the delectable macaroni and cheese. What vegetable could you order to go with that?” By helping children to think through their orders, you can reinforce healthy eating habits.
Adding Up to Five

Children can find different ways to “make five” with healthy fruits and vegetables.

* Try This!

Copy the Try for Five Chart on page 55 to encourage children to keep track of how many fruits and vegetables they eat during the day. Any for breakfast? Lunch at school? Snack? Help children add up the total and fill in the numerals: “I ate ___ servings of fruits and vegetables today. I need to eat ___ more fruits and vegetables today to make five.”

Children will:
- Practice adding and subtracting

Materials:
- Large paper plates (one per child)
- Reuse the handouts on pages 34, 45, and 62 (one copy of each per child)
- Scissors
- Glue sticks

Activity:
1. Help children cut apart the fruits and vegetables on their pages and spread them out where there is space. (Set aside cards that show foods other than fruits and vegetables. Put them in the play kitchen area for children to use during dramatic play.)

2. Have each child select five fruits and vegetables they’d like to have in a day by counting them and placing them on their plate. Encourage children to count out loud as they add each item (e.g., broccoli, banana, apple, carrots, and grapes – 1, 2, 3, 4, 5!).

3. They can then bring the plates to a large group meeting to share what they have selected. Now, start adding or subtracting. What happens if children “eat” or subtract two fruits or vegetables? How many do they have left over? Remind children that when it comes to eating fruits and vegetables every day, they don’t have to stop at five!

4. Children can glue their favorite combination of five fruits and vegetables to their plates and write the numeral 5 on the back. They can take their plates home with their “Try for Five!” charts.
Try for Five!

Keep track of all the fruits and vegetables you eat today. You can color in the boxes, make an X, draw a picture, or write the name of the fruit or vegetable.

How many spaces did you mark?

I ate ___ fruits and vegetables today.
I need ___ more to make five!
Hello, families!

In our program, we’ve been making sure that we are eating lots of nutritious foods that are low in sugar, fat, and salt.

In the program, children have been:

- Learning about sometime and anytime foods and drinks and the importance of eating five fruits and vegetables every day.
- Rhyming, sorting, counting, and adding and subtracting.

Did You Know?

Children who get all five servings of fruits and vegetables each day are more likely to get the nutrients they need.

We call these healthy foods “anytime foods” because we can eat them every day. We’ve also been learning that foods like cookies, chips, sodas, and other snacks that are high in sugar, fat, and salt are called “sometime foods” because we should only eat them once in awhile.

You can help at home! Children need healthy options in order to make healthy choices. At home, give children lots of healthy foods and drinks to choose from so that no matter what they pick, you’ll know they are getting the nutrients they need to grow and learn every day (“Would you like an apple or a banana? Would you like some salad or some yogurt?”) You can empower children as they make their own choices.

ANYTIME foods and SOMETIME foods Take a tour around the kitchen together and look at the foods you are eating every day to make sure you have lots of the anytime foods such as fruits, vegetables, whole grains, lowfat milk/cheese/yogurt, and lean meats. If you discover any chips, cookies, candy, sodas, or sports drinks, pause to remember that these foods are high in sugar, fat, and/or salt and are only sometime foods.
Amazing Apple Recipes

Your child has learned that some foods are “anytime foods” – nutritious enough to be eaten anytime. Here are some great anytime snacks to try at home.

**Anytime Apple Dip**

**What you need**
- Apples cut into thin slices
- Vanilla-flavored yogurt
- Whole-grain cereal “O”s

**What to do**
Set up an apple dipping station by setting out your plate of sliced apples along with bowls of yogurt and cereal. Let your child dip the apple slices.

**Microwaved Baked Apples**

Looking for an easy and delicious way to add fruit to your child’s lunch? Pack these baked apples in single serving containers.

**Ingredients**
- 2 small apples, sliced (peel if desired)
- 1 Tbsp. apple juice
- 1/2 tsp. brown sugar
- dash of cinnamon

**Directions**
1. Combine ingredients in a microwave-safe bowl.
2. Cover with plastic wrap.
3. Microwave 2-3 minutes, or until apples are soft.
   Stir. Serve when cool.
Now and Later Zucchini Muffins

Your child has been learning that it’s healthy to eat when you’re hungry and to stop when you’re full.

Make this recipe together with your children – it makes enough so that you can enjoy a muffin now and save the rest for later.

What you need
1 1/2 c. shredded zucchini (about 2 small)
2 c. whole-grain pancake or biscuit mix
1 tsp. cinnamon
1 tsp. allspice
2 eggs
3/4 c. brown sugar
1/4 c. unsweetened applesauce
2 tsp. fresh lemon juice
plastic grater
measuring cups and spoons
muffin tin and paper liners

What to do
1. Preheat oven to 375°F. Wash zucchini, remove ends (leave skin on for extra fiber), and shred.
2. Place grated zucchini on paper towels and squeeze to remove water. Measure 1 1/2 cups of squeezed-dry zucchini.
3. In a large bowl, mix whole-grain pancake mix (or biscuit mix) with spices.
4. In a separate bowl, whisk together eggs, brown sugar, applesauce, and lemon juice.
5. Fold the egg-sugar mixture and shredded zucchini into the pancake-spice mixture (do not overmix).
6. Line a 12-cup muffin tin with paper liners. Fill each muffin cup 2/3 full with batter.
7. Bake 10-15 minutes or until golden. Remove muffins from tin and cool on a wire rack.
Chapter 3  Introduction

What My Body Tells Me

Children have been learning all about the healthy, colorful, anytime foods that we should eat each day.

* Did You Know?

When children are urged to "clean their plates," it can lead to overeating. Instead, serve preschoolers small portions of food. A child who's still hungry can have a second small portion. This minimizes waste and encourages children to stop eating when they’re full.

Children have already grouped foods into categories of anytime and sometime foods, thought about different ways to eat five fruits and vegetables each day, and learned where these foods come from. Now children can think about when to eat and how much to eat by listening closely to what their bodies tell them.

- Sing "If You’re Hungry and You Know It" and encourage children to talk about how they are feeling. (page 60)
- Sort foods into different food groups in A Bit of This, a Bit of That. (pages 61-62)
- Read children the story of "Cookie Monster and the Four Bears" and help them learn about how to eat an amount that is just right for them. (page 63)
- Use the Hungry-Full Meter to help children express how they are feeling during snack and lunch time. (pages 64-65)
- Watch "TJ Fruit Samba" and march in your very own healthy parade. (page 66)
- Send home the Family Newsletter and encourage families to think about how to eat appropriate portions. (pages 67-68)

Have fun singing, sorting, and learning together.
If You’re Hungry and You Know It

If you’re hungry and you know it, say, “I’m hungry!” (2 times)
If you’re hungry and you know it
And you really want to show it.
If you’re hungry and you know it
Eat a pear!

If you’re thirsty and you know it, say, “I’m thirsty!” (2 times)
If you’re thirsty and you know it
And you really want to show it.
If you’re thirsty and you know it
Drink some water!

If you feel full and you know it, say, “No more, please!” (2 times)
If you feel full and you know it,
Then say “No” so you can show it.
If you feel full and you know it
Just say, “No more food.”

Say it, do it! After the first stanza, STOP! Children now pretend to eat different HEALTHY anytime foods. Ask children to call out what they are eating as they pretend to put these foods into their mouths. Now... STOP eating! And sing again...

After the second stanza, STOP! Children now pretend to drink different HEALTHY anytime drinks. Ask children to call out what they are drinking as they pretend. Now... STOP drinking! And sing again...

After singing with children, ask them to listen to their bodies. How are they feeling now? Hungry? Thirsty? Full?
A Bit of This, a Bit of That

Children can learn about the different food groups as they explore the concept of a balanced meal.

Try This!
During snack time or lunch, encourage children to think about the foods they are eating. What food groups do they belong to? They are having carrots and cheese, so they have two groups! They have vegetable AND dairy. What if they added a piece of whole-grain bread?

Children will:
- Learn about food groups: vegetables, fruits, dairy, meats, grains
- Discover how to create a balanced meal

Materials:
- One copy of the food sheets on pages 34 and 62
- Scissors
- Paper plates
- Five paper bags
- Large sheet of paper

Activity:
1. Cut out the foods from the sheet and place them on the blank paper for all to see.
2. Introduce the five bags and explain that you have one for each food group. Write a food group label across each bag: Fruits, Vegetables, Meat and Beans, Milk and Dairy, and Grains. Together, look at each card and put it in the appropriate bag.
3. Explain that at meal time it is important to have food from each group. Take out a paper plate and draw a food card from each bag. Place the food cards on the plate to show off your balanced meal. Discuss this meal together – what types of food do you notice?
4. Before snack time or before children head home for the day, give a paper plate to a child. Have him come up and draw a food from each food group bag. What did he get? You can choose a different child each day.

Cookie Monster and the Four Bears

Baby Bear and his family help Cookie Monster (and children) think about appropriate portions of food.

Try This!
At the water table or sandbox, encourage children to explore the concept of empty and full with a variety of containers (plastic cups, ice cube trays, etc.).

Children will:
- Think about portion size
- Explore the concepts of empty and full

Activity:
Read the following story.

Once upon a time, there was a family of four bears – Baby Bear, Mama Bear, Papa Bear, and little Curly Bear. Every day they loved to eat a delicious, healthy breakfast of oatmeal with bananas. One day a friendly blue monster knocked on their door. It was Cookie Monster! He ran into the room and started to eat all the bears’ oatmeal. All of a sudden he said, “Ugh, me feeling so sick. Why me tummy feeling so sick?” Baby Bear said, “You ate too much. You need to eat an amount that is just right for you. Watch, I will show you.”

Baby Bear went to the kitchen and brought back more oatmeal and four bowls. Baby Bear put a small amount of oatmeal in each of the four bowls and he added some sliced bananas. Yummy! All of the bears started to eat their delicious oatmeal. Papa Bear stopped eating and said, “I’m full. I’m not going to eat any more oatmeal.”

Cookie Monster said, “Oh, me see. Papa Bear not eat more because he not too hungry anymore.” Baby Bear was still eating. He said, “I played outside all morning and I am really hungry. I’m going to eat some more oatmeal!” and he put another scoop of oatmeal in his bowl. Baby Bear asked Cookie Monster, “Do you need any more oatmeal?” Cookie Monster put his hand on his stomach and said, “No thank you, Baby Bear. Me full! Me think me already had more than right amount for one Cookie Monster!”
Hungry-Full Meter

Sometimes it can be helpful for children (and adults!) to have a visual reminder that says “stop and listen to your body. How are you feeling?” Remember: You can let children decide how much to eat. Eat slowly together and enjoy the food.

* Try This!

Use the meter during lunch time as well. When children go home for the day, encourage them to take their meters home. They can show their families how they remind themselves to check if they are hungry or full when they are eating. (Children can explain to families how they use the Hungry-Full Meter in your program.)

Children will:

- Think about when they feel hungry and full
- Pause during snack time to decide what is an appropriate amount of food for them

Materials:

- Hungry-Full Meter (copy page 65, one per child; cut and assemble with brass brads or use plastic spoons as arrows)

As you start snack time, ask children:

How hungry are you? Think about how you are feeling right now. You may be feeling hungry because it’s been a long time since you ate breakfast. Or, you may still be full from a big breakfast.

Activity:

1. As you are eating snack, pause and get the whole group’s attention. Show them how you are using your Hungry-Full Meter.

2. Say, for instance, “I’ve had two crackers and three apple slices. How do I feel now? I think I’m still a little bit hungry.” Move the arrow, and then have a bite. “Now I feel just right.” Move the arrow again. Point out that it’s not a good idea to be on the marks below the words “hungry” and “full.” Tell children that the thick middle tick mark means “just right.”

3. Now give each child a meter. As they eat and drink, encourage them to pause and think. Are they still eating because they are still hungry? Or are they already full? They can then use the meter to express themselves.
Handout: Hungry-Full Meter (see page 64)

Cut out arrow and attach to Hungry-Full Meter with a brass brad. Or use a plastic spoon as an arrow.
View and Do: TJ Fruit Samba

Celebrate colorful, delicious fruits – and the energy they give us.

* Try This!
Watch this again before a regularly scheduled snack time.
Have a healthy snack by offering children a selection of real fruits to choose from. Kids can reach for sliced apples, bananas, blueberries, etc.

Children will:
- Recall the names of different fruits
- Think about choosing fruit when they are feeling hungry

 Viewing:
Watch TJ Fruit Samba on the DVD (segment #7) together and ask children about what they saw. What was TJ singing about? There are so many healthy fruits to choose from when kids need an anytime snack.

 Doing:
1. Play music and start a conga line.
2. To get into the line, each child calls out the name of a fruit. They can conga around the room, down the hall, and even outside.
3. Try different ways of inviting children into the line, such as “Anyone wearing purple like a fig, join us!” or “Who loves guava? Come along!” Children might also like to take turns leading the conga line.

Children might be curious about TJ’s wheelchair. If children ask questions, it’s a wonderful opportunity to explain that TJ uses his wheels to get around, just as other kids use their feet. TJ has to be very strong to move the chair with his arms, and he is active in many ways every day. He plays basketball, he dances, and sometimes he needs a rest too.
Hello, families!
We are focusing on how to tell when we are hungry or full.

In our program, children have been:
Exploring food groups, building balanced meals, and learning to eat just the right amount of healthy foods – not too little and not too much.

Did You Know?
When children are urged to “clean their plates,” it can lead to overeating. Instead, serve preschoolers small portions of food. A child who’s still hungry can have a second small portion. This minimizes waste and encourages children to stop eating when they’re full.

Need a breakfast on the go?
Try these instead of doughnuts or toaster pastries:
Fruit and cream cheese sandwich: Layer lowfat cream cheese and sliced fruit on whole-grain bread, 1/2 bagel, or English muffin.
Breakfast taco: Sprinkle shredded lowfat cheese on a whole-wheat tortilla. Microwave for 20 seconds and serve with a spoonful of salsa, if desired.

We’ve been doing activities to help children think about portion size, and children have built balanced meals together.

You can help at home! Every child has different food needs. It’s okay for a child to take only a little bit of food and then say he is full. However, it is not okay for him to then want to eat cake, or other sometime foods instead! By paying attention to your child’s cues and listening to him, you can make sure he’s eating the right amount. One way to think about this balance is that you provide the healthy choices, but your child can decide how much to eat.

Activity Ideas
• Eating Healthy Foods Together Whether you are serving your child or he is serving himself, start by putting small amounts of each food on the plate and letting him choose if and what to eat. When he finishes eating, ask, “Are you still hungry?” Giving him the chance to respond helps your child learn to make healthy choices. Encourage everyone at the table to mention how they are feeling: “Hmmm, I’m just a little bit hungry. I’ll have a couple more bites and then I’ll be finished.”

• Explore Full and Empty The next time your child is taking a bath or playing with sand, encourage her to explore filling and emptying small and big containers (e.g., pails, plastic measuring cups). Point out that our stomachs also can be empty or full.
Building a Balanced Meal

You can help at home. Use this picture of a plate to help remind your child how to build a delicious, nutritious, and colorful meal. Display it on the refrigerator and refer to it as you plan meals together.

Think of your plate divided into four equal sections. Use one of the top quarters for protein. Use the other top quarter for starch, preferably a whole grain. Then fill the bottom half with vegetables! None of the foods should overlap or be piled high. Dividing your plate like this can help you keep portion sizes under control, and it will also help you balance your meals.
Every day is a healthy day

It’s true – every day can be a healthy day for you and your children.

Help children bring together the learning they’ve done so far. Celebrate their achievements as you all stay healthy and strong – every day.

**Chapter 1 :: Bringing It All Together**
Children reinforce what they’ve learned through activities focusing on healthy eating and movement.

**Chapter 2 :: The Power to Make Healthy Choices Every Day**
Children practice using the knowledge they’ve gained to make healthy choices – even when there are obstacles, like a rainy day.

**Chapter 3 :: Celebrating What We’ve Learned Together**
To help children take pride in all the learning that’s been happening in your program, you can play games together, help them make healthy superhero bracelets, and plan a Healthy Happy Party for all.
Chapter 1  Introduction

Bringing It All Together

This chapter focuses on reviewing everything children have learned so far.

* Did You Know?

Children at this age love to imitate adults, so show them your healthy side by eating nutritious foods and getting lots of physical activity.

You can integrate everything you’ve learned into various activities that pull it all together into one big picture. Together, you and your children can make good choices and build a foundation of healthy habits for life. The following activities offer fun ways to make these habits part of children’s everyday routine.

- Celebrate movement with the Choose a Move poem. (page 71)
- Help children create a Healthy Week Banner so they can proudly share their healthy choices. (page 72)
- Play the Healthy Land board game (pages 73-74).
- Reinforce the concepts in the last two sections of this binder by becoming a Healthy Team. (page 75)
- Watch Mango Tango on the DVD and play a silly rhyming game about dancing with healthy foods. (page 76)
- Send home the Family Newsletter to update families about everything children have been learning, and offer adults ideas to help children learn at home. (pages 77-78)

Have fun singing, dancing, and rhyming together as children integrate everything they’ve learned.
Choose a Move

Choose a move. Choose any one! Let’s keep on moving. It’s so much fun!

Say it, do it! Help children get moving in a way that gets their hearts pumping.

Start a movement parade! March around the room or outside and say the poem together. Say “Stop” and call out one of the moves from this page. Children do that move until you say “March”!

- stretch! fly!
- do some jumping jacks!
- hop! balance on one foot!
- skip!
- run! walk! jog!
- twirl! leap! dance!
Healthy Week Banner

Children can create a banner together listing the healthy choices they're making each day of the week.

* Try This!
Children can draw pictures to go with their choices. You might choose a different child to be the illustrator each day.

Children will:
- Recall key messages about eating healthy foods and staying physically active
- Share the choices they have made

Materials:
- Large white piece of paper (long enough to be divided into five sections for the days of the week)
- Tape

Activity:
1. Show children the large paper you've taped to the wall (or put on the easel) at the front of the group.
2. Write “Our Healthy Week” at the top of the paper. Create five sections and write each weekday at the top of each section. Explain that you are all going to keep track of the many things you're doing each day to stay healthy and strong.
3. Each day during circle time, ask children a different question about food or physical activity choices. Try these questions:
   - What fruits did you eat today? What vegetables?
   - How did you move your body today?
   - When did you drink lowfat milk or water today?
   - What games have you played outside today?

Write children's responses on the banner. They can be individual achievements (“Ryan ate broccoli at lunch”) or group achievements (“We all had lowfat milk at snack time”).
Healthy Land

Children will think about the effects of healthy foods as opposed to unhealthy alternatives as they play this board game.

**Try This!**

Use double-sided tape or glue to paste a copy of the game to a piece of cardboard to make it into a real board game. (You might also laminate the paper first.) You can also send the game home for children to play with their families.

**Children will:**
- Reinforce their understanding of healthy foods and drinks
- Engage in basic rule-based play
- Build math skills

**Materials:**
- Small blocks or any small, colored manipulatives as game pieces
- Six index cards (numbered as follows: 1, 1, 2, 2, 3, 3)
- Copies of the Adventure in Healthy Land game on page 74 (one for every three or four children)

**Activity:**

During a large group meeting, share the game board and point out the pictures. Say that in this game, landing on anytime foods gives them energy to play with the Sesame friends!

Demonstrate the rules by modeling:

1. Choose a game piece (a manipulative or small block). Place number cards facedown and let a child choose from the deck.

2. Start at Salad Meadow. Move the game piece forward the number of spaces on the card. If you land on an anytime food, you get to choose another card. If you land on a sometime food, stop on that space until your next turn. (After each move, place card in discard pile. If you run out of cards, shuffle cards from discard pile and use again.) The goal is to get all pieces to the end.

3. Place the games on a shelf in your room. Groups of three or four children can play during free time.
Bananas are a fruit. What's your favorite fruit?

Name another red fruit.

Name another healthy, round food.

Move 2 spaces.

Move 1 space.

Lowfat milk

Adventure in Healthy Land

Salad Meadow

Raspberry Patch

Orange Grove

Banana Bend
Your Healthy Team

Being healthy is a team effort. Children can’t do it alone, so show them who’s on their team and how teams can get the job done.

* Try This!
Ask children about ways to help grown-ups with healthy habits. For instance, they can suggest fruits and vegetables for snacks and lowfat milk and water for drinks. Encourage children to be the teachers!

Children will:
- Learn they have help and support to be healthy
- Discover that they can inspire adults to be healthier
- Get an introduction to the “healthy team” concept

Activity:
1. Begin with a conversation about teams. What is a team? What are some different kinds of teams (sports teams, a class at preschool, a family, a community)? Explain that children are also part of a healthy team – a group of people who care for one another and want to be healthy together.

2. Ask children to think about who helps them eat nutritious food and be active (play). Write their answers on a large sheet of paper. The list can include grown-ups (parents, other relatives, teachers, coaches) and children (siblings, cousins, friends). Help children think about what each member does (a parent might make meals, a friend can play outside with the child, etc.).

3. Share these scenarios and ask children to call out which member of their healthy team would be able to help.

    - It’s dinnertime and you’re hungry. Someone is at the stove in the kitchen cooking dinner. Which team member is it? (Dad, Mom, grandmother, babysitter, etc.)
    - You’re on the playground and you want to play tag. Who can you play with? (Friends)
    - Your family is deciding how to spend the day on Saturday. Who can suggest some great ways to be active and have fun? (The child)
View and Do: Mango Tango

Children will watch Mango Tango on the DVD and then play a rhyming dance game that focuses on healthy foods and healthy moves.

* Try This!

During snack time, ask children to fill in the missing word for these silly rhymes.

I’m dancing with an apple
And I’m wiggling like an otter.

I dance, and dance, and dance, and dance.
And then I drink a little ______. (water)

I’m dancing with a bean
who’s long and thin and green.

I dance and groove, but the bean won’t jam.

Maybe next time I’ll ask a ______. (yam)

Children will:

- Rhyme about some of the healthy foods they’ve learned
- Dance together in various ways
- Learn about letter sounds
- Reinforce the relationship between healthy eating and active movement

Viewing:

Watch Mango Tango on the DVD (segment #8). Together, discuss what you see and hear. What words did children hear over and over again? Did they hear words that rhyme, or sound the same?

Doing:

1. Invite children to make up silly rhymes like Mango Tango for different fruits and vegetables. Nonsense words like Apple Bapple are fine.

2. Turn on music and let them make up the Apple Bapple dance. This focus on dance combined with healthy foods helps children link two elements of a healthy life: eat healthy foods and stay physically active every day.
Hello, families!
In our program, we’ve been reinforcing what we’ve learned so far about healthy habits.

Weekend Update:
We’d like to celebrate the good choices your family makes on the weekends. Complete the Weekend Update chart with your child to record the ways your family ate right and stayed physically active. Children can share their healthy news on Monday.

* Did You Know?
Children at this age love to imitate adults. So show them your healthy side by eating healthy foods and getting lots of physical activity. It’s your chance to inspire a lifetime of healthy habits!

But we know children can’t do it alone. Who’s on your child’s team? You, your child, and the whole family are important members of your own Healthy Team. You lead the way by choosing to serve healthy foods and planning physical activity into your days. And let your child take the lead once in awhile. She will love sharing all she has learned about eating right and being physically active.

You can help at home!
Here’s a recipe for a healthy day:
- 5 fruits and vegetables
- + 60 minutes of physical activity
= a great start!

Can you dance and rhyme at the very same time?
Say this Silly Food and Dance Rhyme with your child. Make sure he moves the whole time you are talking and then let him fill in the silly rhyme.

- I am dancing with my string cheese,
  With its loopy, loopy loops.
  We dance, and dance, and dance, and dance.
  Then we try our hula _____ . (hoops)

What other silly rhymes can you make up about dancing with food?
What have you been doing over the weekend to stay healthy and strong?
Write it down and then invite your child to draw a picture of a favorite healthy moment.

What fruits did you eat this weekend?

What vegetables?

Did you drink nonfat milk or water instead of other drinks?

How did you move your body this weekend?

What games have you played outside?

Lowfat milk

Lowfat milk
Chapter 2 Introduction

The Power to Make Healthy Choices Every Day

Children have learned what they need to do to stay healthy and strong. This chapter focuses on helping children to use the information they’ve gained to make healthy choices.

* Did You Know?
When adults provide meals and snacks on a regular schedule and offer children a variety of healthy foods and drinks, children are more likely to develop healthy eating habits.

Even when children have the knowledge to make healthy choices, they need adults to provide healthy options. For instance, if you offer a banana, apple, or melon as a snack, children can make healthy choices on their own. Through teamwork, along with children and their families, you can help build this foundation.

- Begin by singing Healthy Choice Voice and encourage children to notice how healthy foods make them feel. (page 80)
- Bring children together to prepare nutritious and delicious choices to enjoy with friends. (page 81)
- Help Grover make healthy choices in Help Grover Decide. (page 82)
- Go on a Healthy Day Hunt. (pages 83-84)
- Watch Elmo Tricycle on the DVD and explore what it means to be “proud” of their healthy choices. (page 85)
- Send home the Family Newsletter to help adults foster children’s learning at home. (pages 86-87)

Have fun making healthy choices together!
Healthy Choice Voice

Sing words to the tune of “Old MacDonald Had a Farm”:

If you make a healthy choice,
there’s so much you can do.
You’ll move, and grow, and learn, and play,
And feel so healthy too.

(Say: What if I sit around all morning and I’m feeling really s-l-o-w?)

Then jump up and go out to play
and run and dance and move.
You’ll feel so good you’ll shout, “Hooray!”
You’re in a healthy groove.

(Say: I’m at a birthday party and there’s cake.)

Eat a little cake, yum, yum,
but have some fresh fruit too.
It’s juicy and it’s sweet and nice,
it is so good for you!

(Say: I’m really thirsty and in front of me there is a big glass of soda and a glass of water.)

Drink a glass of water now
to help you feel okay!
Water keeps us healthy as
we jump, and skip, and play.
Nutritious and Delicious

A nutritious snack can keep children feeling good and tide them over until the next meal. Children can work together to prepare these delicious snacks. They’re great alternatives to sometime foods, and perfect for a Happy Healthy Party. As they share the food, children see how wonderful it can be to relax and enjoy food with friends. You can also copy this page and send it home with children.

Children will:
- Practice counting and identifying shapes
- Enjoy healthy food with their friends

Celebrate with healthy snacks:
Choose these alternatives to typical party snacks.

1,2,3 Sesame Salsa
Mix equal parts black beans (rinsed), corn, and mild salsa. Serve with baked tortilla chips.

Self-Serve Fruit Salad
A variety of cut-up colorful fruits in different bowls. Try strawberries, blueberries, orange sections, kiwi, and banana! Give each child a small bowl and invite them to create a very colorful fruit snack!

Super Shapes
Presentation makes a difference. Try cutting whole-grain bread into fun shapes.
- Squares: Cut a sandwich into four squares to make mini-sandwiches.
- Triangles: Take a whole-wheat pita and slice into wedges, like a pizza.
- Circles: Work some magic with whole-grain tortillas. Add children’s favorite toppings, roll, then slice into pinwheel-shaped sections.
Help Grover Decide

Calling all children!
Grover needs their help.

Children will:
- Discover that they can help others make healthy choices

Activity:
Read the following out loud. Children can also suggest their own ideas and discuss why they are (or are not) good choices.

Hello everybodeee! It is I, your fuzzy and adorable pal Grover, and do you know what? I need YOUR help. Yes! It is true. Can you help me please? PLEASE? You can? Oh, you are so NICE, and smart too!

I want to make sure I keep my fuzzy and blue body healthy and strong, but I’m not sure what to do. A little bird told me that you know all about how to be healthy, so YOU can help me choose. Oh, it is going to be such a healthy day!

Hello! I have just woken up after a nice long night of beauty sleep. Perhaps I should go right back to sleep and stay in bed for the whole day. Is this a good way to keep this fuzzy and blue body healthy and strong?... No? Oh, well what do YOU think I should do?... I should eat a healthy breakfast? Okay, then what should I do?

A) Play soccer OR B) Watch TV all day long

Now my cute and adorable tummy is telling me that I am ready for a snack. Maybe I can be SUPER healthy if I eat five pepperoni pizzas and drink soda. Do you think this is a healthy snack? ...NO? It is not? Well then, what do you think I should eat so I can have energy for my day?

A) An apple with string cheese OR B) A plate of cookies

Now I would like to build some cute and strong muscles and bones. I should probably eat candy and then take a nap. Is this a healthy choice? ...No again? Oh well, I guess I am not very good at this. What do you think I should do?

A) Play LOTS of video games OR B) Play hopscotch with my friends

Thank you SO much for your help!
Love, your fuzzy, blue, and HEALTHY friend, Grover
Healthy Day Hunt

Children can make healthy choices even when they are faced with less-than-ideal circumstances, such as being stuck inside on a rainy day.

*Try This!*

Encourage children to be Healthy Detectives for the day, searching for healthy activities. If you are outside on a walk, what healthy activities can the Healthy Detectives find and do? If you are playing outside, what healthy things do children see their friends doing? Be sure to join them. At lunchtime, what healthy foods can the Healthy Detective spot? What about at home?

**Children will:**
- Discover how to make healthy choices even when there are obstacles
- Practice identifying anytime foods and healthy activities

**Materials:**
- Copies of page 84 (one per child)
- Crayons

**Activity:**
1. Have children find and color in the healthy choices in the house.
2. When children have finished coloring their pictures, everyone can share their work. What did children color and what did they leave blank? Why?
Color the healthy choices in the house.
Children can feel proud about what they’ve learned as they watch Elmo zoom around on his tricycle.

Try This!
When you can play outside, set up an obstacle course and have children work in teams to complete the course in a relay. Have each child jump over a line of blocks on the grass, run around a cone five times, then jump in and out of three hoops before tagging the next team member to complete the course. They did it! They can say this cheer together:

We feel healthy, we feel proud.
We feel so good we'll shout out loud — YEAH!

Viewing:
Watch Elmo Tricycle on the DVD (segment #9) and talk to children about what they’ve seen.

Doing:
1. Ask children how they think Elmo feels when riding his tricycle. Point out that he had to practice and practice!

2. Introduce the word “confident” and explain that it means Elmo knew he could ride his tricycle if he tried hard enough. Riding around Sesame Street makes Elmo feel proud. Ask, “What do you do that makes you feel proud?” (Learning to ride a bike like Elmo? Catching a ball? Learning to swim? They’ve probably been running for a long time, but when they were babies they couldn’t even walk.)

3. Invite children to try an inside triathlon (in a space where they can move safely from one wall to another). A triathlon is a race made up of three parts – swimming, biking, and running.

4. Children can take turns in groups of three or four pretending to “swim,” “bike,” and “run” in their first triathlon. Children can pretend to swim from one side of the room to the other, reaching out with their arms as far as they can. Then they touch the wall and ride their bike back to the other side – cycling their legs high and bending their knees. Then children can turn and run to complete their triathlon.

5. Ask children how they are feeling when they finish the run! Are they feeling confident and proud?
Hello, families!
In our program we've been practicing how to make healthy choices.

**In our program:**
We've been thinking about the foods and drinks we put in our bodies and the activities we do with our bodies.

*Did You Know?*
When adults provide meals and snacks on a regular schedule and offer children a variety of healthy foods and drinks, children are more likely to develop healthy eating habits.

It's hard for children to choose cucumbers over a cookie—and they don't always have to. Sometimes it's okay to have cookies—as Cookie Monster says, “Cookie is a sometime food!”
But focus on **anytime** foods every day by letting children choose from a variety of healthy foods, including fruits and veggies, and offering water and lowfat milk to drink.

**You can help at home.** Offer your child the choice between two healthy options such as tomatoes and cucumbers, rather than between vegetables and a cookie or other sweet. In addition to offering children lots of healthy foods, you can model healthy eating and a physically active lifestyle.

**Let him do it.** Children enjoy eating snacks they make themselves. A turkey cheese rollup is the perfect “recipe” for the first-time cook. Set out a piece of lean turkey deli meat, lay a slice of cheese on top and roll it up.

**Throw your child a curve.** Try clever new combinations:
- Cream cheese and peach or nectarine
- Chocolate graham crackers with strawberries or banana
- Steamed broccoli and cauliflower florets with ketchup
- Cucumbers or red bell pepper with hummus
- Melons or grapes with cheddar or American cheese
- Mushrooms and fresh greens with lowfat ranch dressing
- Fresh tomato, mozzarella cheese, and fresh basil

---

Elmo’s Happy Healthy Day

After a long day of learning and playing, it's time to let your body and mind rest. Before bedtime, share Elmo's Happy Healthy Day with your child. Fill in the blanks with healthy foods and activities of your child's choice.

It was morning. Elmo ate a healthy breakfast of __________, with a glass of __________.

Everything was delicious!

Elmo ran outside to meet his friend Zoe at the park. Ernie came along with a ball. They all decided to play a game of __________ together.

Then they went to Hooper’s Store for a healthy lunch. They each ordered __________ with __________ and a tall glass of __________.

They played all afternoon. Then Elmo said good-bye to his friends and washed his hands before dinner. Elmo and his family ate __________, __________, and __________ together.

Afterward, Elmo read a book and talked to his Mommy and Daddy. Then it was time for bed.

Good night!
Chapter 3  Introduction

Celebrating What We’ve Learned Together

In this chapter, it’s time to celebrate. The following pages offer ways to have fun while motivating children to continue to do all they’ve learned together.

* Did You Know?

Preschoolers can learn from friends – they’re more likely to try a new healthy snack if it’s being shared in a group setting. So the next time your class is celebrating a birthday or holiday, celebrate with healthy snacks.

At the end of Chapter 3, you’ll find ideas for throwing a Healthy Happy Party. Let the celebration begin!

- Play *Cookie, Cookie, Cucumber*, a healthy twist on the classic *Duck, Duck, Goose*. (page 89)
- Play *Hoppity Hopscotch* together and help children remember delicious fruits and vegetables. (page 90)
- Watch *Get Healthy Now* together on the DVD. (page 91)
- Become *Super Healthy Heroes* to celebrate all you’ve learned about nutrition and fitness. Help children make their own Super Healthy Hero bracelets and let them zoom around the room. (pages 92-93)
- Watch *Fruit Dance* and *Veggie Dance* (2 different segments) on the DVD and sing and dance along. (page 94)
- Throw a *Healthy Happy Party* in your program – invite families too. (page 95)

Have fun playing games, celebrating, and learning together.
Cookie, Cookie, Cucumber

Children can stay physically active and celebrate what they’ve learned about sometime foods and anytime foods as they play this healthy twist on Duck, Duck, Goose.

Children will:
- Play an active game together
- Recall important messages about sometime/anytime foods

Activity:
1. Ask children to name some anytime foods, then some sometime foods. Refer to the list on page 100 to be sure which is which.

2. Say you are going to play a game of Cookie, Cookie, Cucumber, which is a lot like Duck, Duck, Goose. You can take a turn first to demonstrate. Have all children stand up in their places. As one child is walking around, children can run or march in place – so everyone is active for the entire game.

3. Choose one sometime food and one anytime food (e.g., candy and spinach). As you walk around the outside of the circle touching each child say, “Candy, candy, candy.” When you choose a child to chase, say, “Spinach.” This healthy anytime food gives the child the energy she needs to run after you! Try to get to her spot before she catches you. Then it is her turn.

4. Help her choose a sometime food and an anytime food; continue the game. Play until all children have had a chance to be the “chaser.”
Hoppity Hopscotch

Children can learn the difference between hopping and jumping and think about healthy anytime foods as they play this twist on the classic Hopscotch game.

*Try This!*

Try this new way to play. Cut small pieces (no bigger than two-inch squares) of colored construction paper in red, orange, yellow, green, and blue. Tape the colored squares in the corner of each hopscotch square. When children toss the block to a square and hop or jump to it, they can name the color they’ve landed on and call out a fruit or vegetable to match:
- Red – strawberry!
- Yellow – pepper!
- Green – broccoli!
They’re jumping on a rainbow of healthy colors. If you are playing outside, use different colors of chalk for each square.

Children will:
- Recall the names of fruits and vegetables
- Work together to share what they’ve learned
- Strengthen balancing skills through play
- Learn the difference between a hop (on one foot) and a jump (on two feet)

Materials:
- Chalk (for outside play) or tape (for inside)
- Small block or other marker

Activity:
1. Make a hopscotch board with at least ten squares on the ground outside or on the floor.
2. Encourage children to take turns tossing a small block onto a square. This is the square they need to hop or jump to. Before children move, ask them if they are going to HOP on one foot or JUMP on two feet.
3. Once a child reaches the block, he calls out an anytime food (any fruit, vegetable, whole grain, lowfat dairy, or water). If he cannot think of one, the group can help. Then it’s another child’s turn to play.
View and Do:
Get Healthy Now

Children can share what they’ve learned about the importance of “eating your colors” as they pretend to be the Fruit-n-Veggie Five – the performers in the video.

* Try This!
Have children think of anytime foods in food groups other than fruits and vegetables.

Children will:
- Think about eating colorful anytime foods
- Remember that they should eat five fruits and vegetables every day
- Sing together
- Explore sequencing

Viewing:
Watch The Get Healthy Now Show on the DVD in separate segments throughout the day. Encourage children to sing and dance along with the video as they watch.

Materials:
- Five pieces of construction paper (red, orange, yellow, green, and purple)

Doing:
1. When you’ve finished watching all three segments, children can take turns (five at a time) being the Fruit-n-Veggie Five. The rest of the group can be the audience at their concert.

2. Hand out the construction paper (one to each of the fruit-n-veggie five) and have each child tell you what fruit or veggie they are. (Red = apple, orange = carrot, green = broccoli, yellow = pineapple, and purple = eggplant.)

3. Have the group stand in front of the “audience” on the rug. Then choose one child to be the Big Tomato! He can call the band up “on stage” (in any order) by calling out colors until all of the Fruit-n-Veggie Five are ready on stage.

4. The Fruit-n-Veggie Five can lead a call and response song, just like in the video. (The child with red paper jumps up and says “apple.” Everyone repeats “apple.”) Continue until all colors have been repeated.

5. Hand the paper to five more children – and bring on the next Fruit-n-Veggie Five!
Activity

Super Healthy Heroes

Children share what they’ve learned about eating well and staying physically active with their own Super Healthy Hero bracelets, which they can wear home.

* Try This!

Say this cheer together as superheroes hold their bracelets up to the sky. Let children run and “fly” around the room or outside as they pretend to be superheroes. You can laminate or use clear tape to protect the bracelets.

We’re the Super Healthy Heroes!
We’re healthy every day.
We eat our fruits and veggies.
We run and jump and play!

Children will:
- Feel proud of all they’ve learned about staying healthy
- Enjoy pretending to be a superhero

Materials:
- Copy the bracelets on page 93 (one per child)
- Crayons

Activity:
1. Tell children they’ve learned so much about how to stay healthy every day that they are now officially Super Healthy Heroes. They can make their healthy power bracelets so everyone can see how healthy and strong they are.
2. Have children color their bracelet pages. They can use the crayons to draw pictures of favorite fruits and vegetables, or games they like to play outside.
3. When children have finished decorating their bracelets, cut them out and tape them together around children’s wrists. Now you have a whole room full of Super Healthy Heroes!
Decorate your bracelet with pictures of your favorite fruits and vegetables, or games you like to play outside.
View and Do: *Fruit and Veggie Dance*

Children can watch *Fruit Dance* and *Veggie Dance* on the DVD and dance along.

**Try This!**

Bring a CD player and some of children’s favorite CDs. Show *Fruit Dance* and *Veggie Dance* first to get children up and moving and then turn on some tunes. Move and groove together at your very own dance party. If it’s cold or raining outside, this is a great way to stay active for 15 or 20 minutes straight.

**Children will:**
- Name various fruits and vegetables
- Move together in playful ways
- Prepare a dance for the Healthy Happy Party

**Viewing:**

Watch *Fruit Dance* and *Veggie Dance* on the DVD (segments #11 and #12 have similar songs and dances, one for fruits and one for vegetables). Encourage them to sing and dance along.

**Doing:**

1. Have children gather (make sure they have room to move safely). Play the DVD and dance along together.

2. Encourage the group to copy some of the moves children are doing on screen and then see if they can make up their own moves. If you watch *Fruit Dance* first, encourage children to pay close attention to the words in the song. Now play *Veggie Dance* and see if they can sing along. The songs are similar, following the same rhythm.

3. Children can call out the names of the foods they see on the screen.
Healthy Happy Party Time

Children can help you plan a party for their families to attend to celebrate everything they’ve learned. Planning a party will get everyone working together as a team and let them celebrate their accomplishments with their families.

Children will:
- Celebrate what they have learned
- Teach others what they know
- Plan an event together

Materials:
- Invitations, with a request to bring a favorite “anytime” snack (see ideas on page 81)
- Markers or crayons
- Paper plates and napkins
- CDs and CD player, Healthy Habits for Life DVD

Plan the party:
Tell children that together, you will throw a Healthy Happy Party so that everyone can celebrate what they’ve learned. Suggest that children decorate the invitations to take home to their families.

Have the party! Here are some ways you might celebrate:
- Choose a few songs, dances, or activities to share with everyone who comes to the party.
- Tape the poster pages from previous chapters up on the wall and choose one to say as a group.
- Create a Healthy Museum and highlight all the artwork and other projects children have done.
- Have children put on a show with one of the songs or poems.
- Show the Fruit Dance and Veggie Dance on the DVD so that children can dance along. Then have a dance party – play CDs and encourage everyone to stay active together. (What dance moves can adults teach children? What moves do children want to share with adults?)
- Meet on the rug. You can go around the circle asking adults and children alike to name their favorite fruit (or their favorite vegetable, physical activity, etc.). You might even graph the results of your survey.

Send home the family newsletter.
Hello, families!
Families and children
deserve a BIG congratulations!

* Did You Know? 
Children who eat family meals
eat more nutritious food, but
that's not all. Family meals give
children and families a chance
to reconnect. Whether you're
having pizza or a full-course feast,
it's a chance to celebrate
something very important —
being together.

We've completed the Healthy Habits
for Life program. We've learned to
make healthy choices, stay physically active,
limit sedentary time, eat our colors, eat at
least five servings of fruits and vegetables a day, and listen to our
bodies. We want to thank you for being a key member of your
child's healthy team. You can congratulate your child with the
certificate you received. Have your child fill in his name and color
it, then display it on the refrigerator.

You can help at home. We've made nutritious food and
physical activity part of our daily routine and hope you'll find
ways to do the same at home. Take advantage of the everyday
moments you share with your child. In the kitchen, talk
about why you chose a certain vegetable for dinner. Or whip up
a healthy snack together. Also be ready with activity ideas
(especially on bad weather days) so your child doesn't spend too
much time on the couch.

Little by little, you can weave healthy habits into your family's
routines. For inspiration (or a few good ideas), look no further than
your child. Do you know how to dance the Mango Tango?
Your child can show you how.
Keep up the great work,
You are building Healthy Habits for Life!

WWW.SESAMEWORKSHOP.ORG/HEALTHYHABITS :: PAGE 97
Fruits and Vegetables Rainbow

Here’s a handy list of fruits and vegetables by color. Remind children to “eat their colors”!

**Purple**
- Blackberries
- Elderberries
- Plums
- Purple cabbage
- Purple Belgian endive
- Black currants
- Purple figs
- Raisins
- Purple carrots
- Purple peppers
- Dried plums
- Purple grapes
- Purple asparagus
- Eggplant
- Potatoes (purple fleshed)

**Red**
- Blood oranges
- Cranberries
- Red pears
- Strawberries
- Red peppers
- Red onions
- Tomatoes
- Red apples
- Red grapes
- Pomegranates
- Watermelon
- Radishes
- Red potatoes
- Cherries
- Red grapefruit
- Raspberries
- Beets
- Radicchio
- Rhubarb

**Yellow**
- Yellow apples
- Grapefruit
- Pineapples
- Yellow peppers
- Yellow winter squash
- Cape gooseberries
- Lemon
- Yellow watermelon
- Yellow potatoes
- Sweet corn
- Yellow figs
- Yellow pears
- Yellow beets
- Yellow tomatoes
- Yellow summer squash

**Orange**
- Apricots
- Nectarines
- Peaches
- Butternut squash
- Rutabagas
- Cantaloupe
- Oranges
- Persimmons
- Carrots
- Sweet potatoes
- Mangoes
- Papayas
- Tangerines
- Pumpkin

Continued on page 99.
Continued from page 98.

**Green**
- Avocados
- Honeydew
- Green pears
- Asparagus
- Broccoli rabe
- Green beans
- Chayote squash
- Leafy greens
- Green onions
- Green peppers
- Spinach
- Green apples
- Kiwifruit
- Artichokes
- Broccoflower
- Brussels sprouts
- Green cabbage
- Cucumbers
- Leeks
- Okra
- Snow peas
- Watercress
- Green grapes
- Limes
- Arugula
- Broccoli
- Chinese cabbage
- Celery
- Endive
- Lettuce
- Peas
- Sugar snap peas
- Zucchini

**White**
- Bananas
- White peaches
- Ginger
- Kohlrabi
- Parsnips
- Potatoes (white fleshed)
- Shallots
- Turnips
- Brown pears
- Cauliflower
- Jerusalem artichokes
- Onions
- White nectarines
- Garlic
- Jicama
- Mushrooms
## Sometime & Anytime Foods

**“Anytime” Foods** - These are foods that are good to eat anytime. They are the healthiest foods with nutrients to help you grow up healthy. Examples: fruits and vegetables, nonfat and lowfat milk.

**“Sometime” Foods** - These foods are the least healthy. That’s why they’re once-in-a-while foods. Examples: French fries, cookies, ice cream.
